

IIMT COLLEGE OF NATUROPATHY & YOGIC SCIENCES

ACADEMIC HAND BOOK

**ORDINANCE OF BACHELOR IN NATUROPATHY AND YOGIC
SCIENCES (BNYS) PROGRAMME FACULTY OF AYUSH
APPROVED BY ACADEMIC COUNCIL
ACADEMIC SESSION (2025-2026)**

IIMT COLLEGE AND HOSPITAL OF NATUROPATHY AND YOGIC SCIENCES

1. Preamble-

The degree of Bachelor of Naturopathy & Yogic Sciences is a degree of Naturopathy doctor in exercise of the powers conferred by **IIMT UNIVERSITY**, The standing academic board of **IIMT UNIVERSITY**.

2. Definitions and Nomenclatures

Bachelor of Naturopathy & Yogic Science (B.N.Y.S.)

3. Vision and mission of the School

- Currently Naturopathy is being academically inducted as a bachelor degree programme of five & half years. Bachelor of Naturopathy & yoga Sciences (B.N.Y.S.) in India.
- Unlike other Indian systems of medicine courses, this course has an advantage in having basic sciences similar to that of modern medicine. Strong foundation in the form of basic sciences has not only allowed students to make smarter attempt to understand the clinical theories of Naturopathy but also highlighted the evidence based clinical practice.
- World over there is an aggressive recognition of potential in this system and at the same time the need for rigorous scientific evaluation of health practice used traditionally.
- This has lead to significant scientific authentication of the effectiveness backed by worlds leading Medical Institutions, organizations & even by the Governments acknowledged by National Institute of Health, USA, Ministry of AYUSH, Government of India to name a few.

4. Program Educational objectives

IIMT COLLEGE & HOSPITAL OF NATUROPATHY AND YOGIC SCIENCES established in the year 2019 under IIMT UNIVERSITY, MEERUT with vision to produce highly, qualified skilled, trained, and competent

Mission to establish the IIMT COLLEGE & HOSPITAL OF NATUROPATHY AND YOGIC SCIENCES was specifically centralized to focus on:

- Providing quality education and skilled professionals
- To promote research and development in respective field
- To groom every student to be an excellent professional who follows principals of Naturopathy and yoga

5. Program outcome

1. Recognize the health needs of the community and carry out professional obligations ethically and in keeping with the objectives of the national health policy;

2. Develop the skills in the most of the competencies, and training that are required to deliver the Naturopathy and Yoga health care system
3. Become aware of the contemporary advance and developments in the discipline concerned;
4. Acquire a spirit of scientific inquiry and is oriented to the principles of research methodology and epidemiology
5. Become proficient in the profession by developing scientific temper and improve educational experience;
6. Identify social , economic , environmental, biological and emotional determinants of health in a given case and taken them into account while planning therapeutic, rehabilitation, preventive and promotion measures/strategies
7. Plan and devise measure in naturopathy and yoga for the prevention and rehabilitation of patients suffering from disease and disability
8. Demonstrate skills in documentation of individual case details as well as morbidity data relevant to the assigned situation
9. Demonstrate empathy and humane approach towards patients and their families and exhibit interpersonal behavior in accordance with the societal norms and expectations;
10. Play the assigned role in the implementation of national health programs effectively and responsibly
11. Organize and supervise the chosen/assigned health care services demonstrating adequate managerial skills in the clinic/hospital or field situation;
12. Develop skills as a self directed learner recognize continuing educational needs, select and use appropriate learning resources ;
13. Demonstrate competence in basic concepts of research methodology and epidemiology and be able to critically analyze relevant published research literature
14. To implement all national health policy
15. Work towards realization of 'health of all' as a national goal through naturopathy and yoga ;
16. To follow the medical ethics and to full fill the social and professional responsibilities as a naturopathy and yoga physician through drugless therapies

17. Be competent in the practice of holistic medicine with expert knowledge and experience in health promotion prevention curative and rehabilitative aspects of diseases
18. Become proficient in their profession by developing scientific temper and improve educational experience.

Program Specific outcome

After successful completion of the program an individual will:

- PSO.1 DEMONSTRATE COMPREHENSIVE KNOWLEDGE & UNDERSTANDING OF THE BASIS OF HEALTH & DISEASE & ITS MANAGEMENT-** Graduate should be able to assess the patients with the knowledge of basis medical sciences & correlate the physiological & pathological aspects of the diseases & apply the knowledge & manage the disease by educating & making the concepts clear to patients or students
- PSO.2 DEMONSTRATE SKILL COMPETENCY & TRAINING** – Develop the skill in competencies, and training that are required to deliver naturopathy and yoga health care system to the masses. Demonstrate skills in documentation of individual case details as well as morbidity data relevant to the assigned situation. organize and supervise the chosen/assigned health care services, demonstrate adequate managerial skills in the clinic/hospital or the field situation. Develop skills as a self directed learner; recognize continuing educational needs, select and use appropriate learning resources.
- PSO.3 WORK WITH SELF DIRECTED APPROACH & SOCIAL RELEVANCE** – recognize the health needs of the community become aware of the contemporary advances and developments in the discipline concerned to healthcare through naturopathy & yoga. Thus become proficient in their profession by developing scientific temper and improve educational experience.
- PSO.4 Treat with Empathy, Moral & Human Values-** Plan and devise measures in Naturopathy and yoga for the prevention and rehabilitation of patients suffering from disease and disability. In doing so demonstrate empathy and humane approach towards patients and their families and exhibit interpersonal behavior in accordance with the societal norms and expectations.
- PSO.5 RESEARCH attitude with Evidence Based Practice & Life-long Approach** Demonstrate competence in basic concepts of research and epidemiology, and be able to critically analyze relevant published research literature. Acquire a spirit of scientific inquiry and is oriented principles of research methodology and epidemiology.
- PSO.6 Behave ethically& in Tune with the Laws of the Land** - Carry out professional obligations ethically and in keeping with the objectives of the national health policies and to fulfill the social and professional responsibilities as Naturopathy and Yoga Physician through drugless therapies effectively and responsibly.

PSO.7 Be Environment friendly, Encourage Sustainability and have individualized approach Identify social, economic, environmental, biological and emotional determinants of health in a given case and take them into account while planning therapeutic, rehabilitative, and preventive and health promoting measures/strategies with sustainable approaches by educating the masses.

6. Admission

- Candidates seeking admission to the Bachelor of Naturopathy and Yogic sciences course should have passed at 10+2 pass from board of school Education Uttar Pradesh or an examination recognized as equivalent there to with at least 50% marks in Physics, Chemistry and Biology taken together both in qualifying and competitive examinations.
- Candidate should have completed the age of 17 years at the time of admission or would complete the said age on or before 31st December of the year of admission to the first year B.N.Y.S. course.

7. Eligibility in all year as NEP (entry & exit) as per NEHQF and NSQF (if applicable)

The eligibility of entrance to B.N.Y.S. course is that a candidate must have appeared in NEET qualified with minimum marks at 50th percentile in exam for the said academic year. However respect of candidates belonging to scheduled castes, scheduled tribes, other backward castes, the minimum marks shall be at 40th percentile In respect of the candidates with bench marked disabilities act 2016 the minimum marks shall be at 45th percentile for general category for SC/ST/OBC candidates. The percentile shall be determined on the basis of highest marks secured in the All India Common Merit List in NEET.

The program shall be spread over Five and half academic years, spread over four and half year comprising actual teaching for minimum of 180 days in each year and internship training for 1 year in the fifth year

8. Curriculum

- Duration of the course will be 4 1/2 years +1 (one) year internship. The course will be divided into four parts.

1 st BNYS	-	1 Year (12 Months)
2 nd BNYS	-	1 Year (12 Months)
3 rd BNYS	-	1 Year (12 Months)
4 th BNYS	-	1 & ½ Year (18 Months)

One Year rotatory internship (12 Months)

After completing the course successfully, a graduate will have to under internship for a period of one year. Degree will be awarded only after satisfactorily completing the one-year period of internship.

Internship Training of 12 months is offered in the fifth year. The students are expected to train in Naturopathy and Yoga hospital and OPD, Medical Department and OPD of IIMT' HOSPITAL.

9. Medium of Instruction

Medium of Instruction will be on English Mode.

10. Choice base Credit system (CBCS)/LOCF/OBE

The CBCS provides an opportunity for the students to choose courses from the prescribed courses comprising core, elective/minor or skill based courses. The courses can be evaluated following the grading system, which is considered to be better than the conventional marks system therefore, it is necessary to introduce uniform grading system in the entire higher education India. This will benefit the students to move across institutions within India to across countries. The uniform grading system will also enable potential employers assessing the performance of the candidates. In order to bring uniformity in. evaluation system and computation of the Cumulative Grade Point Average (CGPA) based on student's performance in examinations, the UGC has formulated the guidelines to be followed.

The Curriculum offers a total of 60 courses out of which the student has to complete 60 courses and the total number of credits required for the award of BNYS degree is 209 credits. The courses are divided into 3 categories, i.e. Core courses, Ability Enhancement Courses and Skill enhancement courses

1. **Core Course:** Generally A course, which should compulsorily be studied by a candidate as a core requirement is termed as a Core course.
2. **Elective courses,** a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline/ subject of study or which provides an extended scope or which enables an exposure to some other 01 nurtures the candidate's proficiency/skill is called an Elective Course.
 - 2.1 **Discipline Specific Elective (DSE) Course:** Elective courses may be offered by the main discipline/subject of study is referred to as Discipline Specific Elective (to be offered by main discipline/subject of study).
 - 2.2 **Dissertation Project work:** An elective course of 49 credits designed to acquire special advantage knowledge, such as supplement study/support study to a project work, and candidate studies such a course on his own with an advisory support by a teacher faculty member is called dissertation/project work. A Project/Dissertation project work may be given in lieu of a discipline specific elective paper.
 - 2.3 **Generic Elective course (GEC):** An elective course chosen generally from an discipline subject with an intention to seek exposure to other subjects/disciplines is called a Generic Elective Course.
- P.S.:** A core course offered in a discipline/subject may be treated as an elective by other discipline/subject and Vice versa and such electives may also be referred to as Generic Elective.

3. **Ability Enhancement Courses:** The Ability Enhancement (AE) Courses may be of two

kind's .AE (compulsory Course (AECC) and Skill Enhancement Courses (SEC). AECC courses (two) are the courses based upon the content that leads to knowledge enhancement. They [(i) Environmental Science, (ii) English/MIL Communication] are mandatory for all disciplines. SEC courses (minimum two) are value-based and/or skill-based and are aimed at providing hands-on-training, competencies- skills, etc.

All core courses have a practical component, along with theory. Ability Enhancement courses are theory based and Skills enhancement courses have theory with the practical

Component if required, however external practical evaluation is offered only for compulsory subjects.

List of all courses under different categories for BNYS Programme.

11. Attendance

The students are expected to attend all the classes and should not have less than 75 % attendance in theory as well as in practical classes, wherever held, to become eligible to appear for the university examination. Short fall in attendance can, however be condoned in deserving cases to the extent of 10% by the Principal. If the short fall is more than 10% but not more than 15%, the Principal may recommend deserving cases to the Vice Chancellor for condonation. The order of the Vice Chancellor in this regard shall be final.

12.1 Condonation of medical cases

It will be consider only when an authentic certificate issued by Registered Medical Consultant and Practitioners.

13.1 Internal Assessment (IA) (External Assessment (EA))

13.2 Practical Assessment

Internal Assessment (IA) (External Assessment (EA))

12. Internship – Research / Industrial Internship

Internship Duration: 12 months.

Internship a phase of training wherein a graduate student is expected to conduct actual practice of Naturopathic Modalities and acquire skills under the supervision of a competent faculty member so that he/she may become capable of working independently. A project work to be carried out by student individually.

Specific objectives of Internship: At the end of the internship the student should be able to:

- (i) Diagnose a disease and prescribe the right treatment.
- (ii) outline the planning requirements of such a service
- (iii) Explain its organization and management
- (iv) Identify various management issue.

Time allocation to each discipline is approximate and shall be guided more specifically by the actual experience obtained.

COMPULSORY POSTINGS DURATION

- Nutrition, Fasting, Dietetics & Herbology
- Massage, Aromatherapy, Chiropractic & Osteopathy
- Hydrotherapy, and Clay therapy
- Pranic Healing
- Chromo therapy and Magneto therapy
- Acupuncture, Acupressure & Reflexology
- Yoga therapy
- Diagnostic Methods in Naturopathy & Yoga
- Modern Diagnostic Methods
- Obstetrics & Gynecology
- Family Welfare Planning
- Community Medicine
- First Aid & Emergency
- General Medicine
- Physiotherapy
- Psychology and Psychiatry

13. Maximum duration of programme/promotion policy

The program shall be spread over Five and half academic years, spread over four and half year comprising actual teaching for minimum of 180 days in each year and internship training for 1 year in the fifth year

14. Credit system & grading CGPA/SGPA

(Si) $E (C_i \times G_i) / C_i$ where C_i is the number of credits of the i th course and G_i is the grade point scored by the student in the i th course

CGPA $E (C_i \times S_i) / C_i$ where S_i is the SGPA of the i th semester and C_i is the total no. of credits in that in that semester.

The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

15. Class / division

In implement the following grading system, the college/campuses shall use the following UGC 10 point grading system

Percentage of marks	Letter grade	Grade points
85% & above	O(Outstanding)	10
80.84.99%	A+ (Excellent)	9
75.79.99%	A(Very good)	8
65.74.99%	B+(Good)	7
60.64%	B (Above Average)	6
50.59.99%	C (Average)	5
50%	I (FAIL)	0
0	Ab (absent)	0

15. Transfer of credit /Academic Credit Bank

Not Applicable.

16. Student Welfare

Any act of indiscipline of a student reported to the Dean (Students Welfare) and Head of the Department will be referred to a Discipline Committee constituted for the purpose. The Committee will enquire into the charges and decide on a suitable punishment if the charges are substantiated. The committee will also authorize the Dean (Students Welfare) to recommend to the Vice-Chancellor for the implementation of the decision. The student concerned may appeal to the Vice-Chancellor, whose decision will be the final.

17. Ragging

If anyone found active in ragging activity, Action will be taken as order of Anti-Ragging Committee.

18. Power of modify

In the event of any emergent situation, if any deviation is considered necessary, the Vice Chancellor is authorized to modify the Ordinance, subject to subsequent ratification by the executive council.

19. Any other heading as per your program

Note:-

- Nothing in the Ordinance shall debar the University from amending the Ordinance and the same shall be applicable to all the students whether old or new.
- Any other provision not contained in the Ordinance shall be governed by the rules and regulations framed by the University from time to time.
- In case of any dispute, the Vice-Chancellor will be competent authority to interpret the rules and his interpretation shall be final.

FIRST YEAR
1. HUMANANATOMY

Objectives

Course Type- Core Course

Course Code – BNY 101, BNY 102, BNY 103P

Credits- 4

It aims at giving inclusive knowledge of the gross and microscopic structure and development of human body to provide a basis for assessing the correlation of organs and structures and anatomical basis for disease presentations.

Theory

1. General anatomy in brief:
 - basic tissues of body.
 - terminology and nomenclature
2. Elements of anatomy in brief:
 - osteology
 - arthrology
 - myology
 - neurology
3. Regional anatomy:
 - upper limb, lower limb
 - thorax - including diaphragm
 - head, neck -brain and spinal cord in brief
4. Embryology (gen. embryology) in brief:
 - development of individual organs and systems
5. Histology:
 - general histology, micro-anatomy of individual organs and system.
6. Applied anatomy

Anatomy Paper-1.

Course content (related regional anatomy, histology, embryology, myology, arthrology & osteology of upper limb, head, neck & brain and microanatomy)

Theory

I. General anatomy:

Introduction of anatomy, anatomical terms, different branches of anatomy, introduction of bones, its classification, functions, applied anatomy; joints-types, actions, applied anatomy; cartilage-types, action, applied anatomy, basics of all the tissues and systems of the human body.

II. Osteology : (bones of skull & upperlimb)

Names of the bones and their positions; general features, skull - all normal and interior of skull & mandible.

III. Muscular system : (head & neck and upperlimb)

Origin, insertion, nerve supply and action of the muscles with the applied anatomy and clinical

testing.

IV. Arthrology: (head & neck, upperlimb)

General features of different types of joints. Brief study of the following joints of the body with movements. Shoulder, elbow, wrist and other smaller joints of head & neck, upper limb.

V. Head, neck and brain

Head and neck- introduction, scalp, face and lacrimal apparatus, sides of the neck, sub occipital triangle, contents of vertebral canal (brief), meningeal layer, cavernous sinuses and other sinuses in brief, hypophysis cerebri, trigeminal ganglion, middle meningeal artery, contents of the orbit, triangles of the neck, ansa cervicalis, parotid gland, otic ganglion, submandibular gland, sublingual gland, thyroid gland, parathyroid gland, thymus, blood supply of deep structure, cervical ganglion, cervical plexus, styloid apparatus, oral cavity, palate, pharynx, auditory tube, nasal septum, paranasal sinuses, cartilage of larynx

Parts of nervous system, meninges, ventricles, motor and sensory pathways, cranial nerve, motor and sensory cortex and their blood supply with cross sectional studies in brief morphology of spinal cord. Section of medulla - pyramidal decussation, sensory decussation, upper part of medulla, pons -mid level, midbrain-mid superior colliculus, inferior colliculus, cerebellum-horizontal- mid sagittal section, horizontal section at interventricular formation, coronal section at anterior commissure, coronal section at mammillary body. Sensory organs (regionwise)-gross anatomy of eyeball, ear, nose and tongue in brief, blood brain barrier.

VI. Upper limb

An introduction, breast, clavipectoral fascia, axilla, lumbar triangle, triangle of auscultation, bursa of upper limb, musculotendinous cuff, intermuscular spaces, cubital fossa, synovial sheath, retinaculum of hand, palmar aponeurosis, spaces of hand, anatomical snuffbox.

VII. Micro anatomy- 12 general topics, 15 systemic topics (separate list attached)

1. Study of microscopes and artifacts.
2. General histology, study of the basic tissues of the body, functional correlation of the structural components of the organs.
3. Systemic histology of concerned organs.

Course outcome

After completion of the program, the student must be able to:

1. Illustrate normal human anatomy clinically important inter-relationship and functional anatomy of bodily structures;
2. Understand histological structures of various tissues and organs and co- relate structure and function in order to understand diseased states;
3. Correlate basic structure and connections of the central nervous system,
4. Explain developmental basis of variations and abnormalities with respect to sequential development of organs and systems, teratogens, genetic mutations and environmental hazards.
5. Demonstrate and identify body structures including topography of living body;

6. Assessment Scheme:

Theory – 70 Marks

Internal Assessment – 30 Marks

Anatomy Paper – 2

Course content (related regional anatomy, histology, embryology, myology, arthrology & osteology of upper limb, head, neck & brain and microanatomy)

I. Thorax

General introduction

Pericardium, thorax wall, position and parts of the heart, conducting system, blood supply and nerve supply of the heart, names of the blood vessels and their distribution in the body, lungs & pleura-general features, surface markings, broncho pulmonary segments, applied anatomy, mediastinum, diaphragm, oesophagus, thoracic duct.

II. Abdomen and Pelvis

Peritoneum-general disposition - horizontal and vertical, parts relation, blood supply, nerve supply of abdominal organs. Pelvic organs-parts position, relation, blood supply, nerve supply.

III. Lower Limb

Deep fascia-modifications, saphaneous veins, lymph nodes, adductor canal muscles-nerve supply, blood supply, action, joints, arches of foot, joints of lower limb.

IV. Embryology in brief:

Definition of embryology , brief account of male and female, ovary; definition of gamete; sperm, ovum, gametogenesis, migration of primordial germ cells into gonadal ridge; structure of sperms growth of ovarian follicles, ovarian and uterine cycles. Principle of family planning (contraception),in-vitro fertilization (for integrated teaching). Systemic embryology (brief): development of the individual organ of digestive system, genital system, urinary system, respiratory system, cardiovascular system, nervous system, special sensory organs (in brief) endocrine glands and mammary gland. Development abnormalities in brief.

Course outcome-

After completion of the program, the student must be able to:

1. Illustrate normal human anatomy clinically important inter-relationship and functional anatomy of bodilystructures;
2. Correlate histological structures of various tissues and organs and co- relate structure and function in order to understand diseasedstates;
 - Deduce basic structure and connections of the abdomen, thorax, lowerlimb
3. Describe developmental basis of variations and abnormalities with respect to sequential development of organs and systems, teratogens, genetic mutations and environmentalhazards.
4. Identify gross congenital anomalies and be familiar with the principles of karyotyping;

Assessment Scheme:

Theory – 70 Marks

Internal Assessment – 30 Marks

Anatomy Practical

Total time: 32-34 weeks.

Gross Anatomy: (dissection / demonstration of following parts of body)

Upper limb: dissection: pectoral, scapular, shoulder, arm, forearm (5 wks) Prosected parts: joints, palm and dorsum of hand.

Thorax: dissection: chest wall, mediastinum, lungs and heart.

Abdomen: dissection: anterior abdominal wall and inguinal region, viscera and posterior abdominal wall.

Pelvis: dissection: pelvic viscera and blood vessels and nerve sagittal section (m & f) (2wks) prosected parts: sole of the foot and joints.

Head and neck: dissection: scalp, superficial and dissection of face and neck (8 wks to 10 wks). Prosected parts: orbit, eyeball, submandibular region, temporal and infra temporal fossa, cranial cavity, naso and oropharyngeal regions, ear, larynx and pharynx. Cross sections at c-4, c-6 levels. Sagittal section of head and neck.

Nervous system: section of brain and prosected specimens and major functional areas, gross structure of brain and spinal cord and study of gross sections as mentioned earlier (in brief).

Demonstrations:

- Bones-as described in osteology section.
- Brain and spinal cord.
-

Specific skills: students should learn the following skills

1. To localize important pulsations and the structure against which pressure can be applied in case of bleeding & trauma of particular artery.
2. To elicit superficial and deep reflexes.
3. To demonstrate muscle testing and movements at joints.
4. To locate for: lumbar puncture, sternal puncture pericardial tapping, and liver biopsy.
5. To locate veins for venous puncture.
6. To locate the site for emergency such as tracheotomy.

Histology

General histology

1. Microscope
2. Cell
3. Epithelial tissue i
4. Epithelial tissue ii
5. Connective tissue-bones and cartilages
6. Muscular tissues

7. Nerve tissues (ts & ls of peripheral nerve, sensory & sympathetic ganglion, optic Nerve)
8. Epithelial glands (serous, mucous and mixed salivary gland)
9. Circulatory system (large artery, medium sized artery, large vein)
10. Lymphatic system (lymph nodes, thymus, tonsils, spleen)
11. Skin & appendages.
12. Placenta & umbilical cord.

Systemic histology

1. Respiratory system.
2. Oesophagus & stomach.
3. Liver, gall bladder, pancreas.
4. Urinary system i (kidney)
5. Urinary system ii (ureter, bladder, urethra).
6. Small & large intestine
7. Reproductive system - female
8. Reproductive system - male
9. Upper GIT (lip, tongue)
10. Hypophysis cerebri, thyroid and suprarenal glands.
11. Eye - cornea and retina.

Course Outcome

After completion of the program, the student must be able to:

1. Illustrate histological structures of various tissues and organs and co-relate structure and function in order to understand diseased states;
2. Deduce basic structure and connections of the central nervous system, understand the regulation and integration of various organs and systems and be skilled in locating lesion sites according to deficits in diseased states;
3. Describe developmental basis of variations and abnormalities with respect to sequential development of organs and systems, teratogens, genetic mutations and environmental hazards.
4. Identify body structures including topography of living body;

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

Text books

1. Text Book Of Anatomy (Vol L-I, II, III) – By B.D. Chaurasia
2. Text Book Of Anatomy – By Hamilton
3. Practical Anatomy - By Cunningham
4. Human Embryology - By Inderbir Singh

Reference Books

1. Text Book Of Anatomy - By Gray
2. Atlas Of Histology - By Diforie
3. Atlas Of Histology - By Poddar

2. PHYSIOLOGY

Course type- Core Course

Course code – BNY 104, BNY 105, BNY 106P

Credits- 4

Objective

The objective of teaching Physiology to undergraduate students is aimed at giving the student comprehensive knowledge of the normal functions of the organ systems of the body to facilitate comprehension of the physiological basis of health and disease.

THEORY

Physiology paper – 1

I. GENERALPHYSIOLOGY

1. Cell structure
2. Sub-cellularunits
3. Cell membranes and theirproperties
4. Transport mechanisms
5. Bioelectrical potentials
6. Body fluids andhomeostasis

II. BLOOD – Physical properties, composition and functions ofblood.

1. **Plasma proteins**
 - a) Normal values
 - b) Origin and methods ofseparation
 - c) Functions and variations in health anddisease.
2. **Bonemarrow**
 - a) Formed elements
 - b) Composition andfunctions
3. **Erythrocytes**
 - a) Morphology and variations in health anddiseases
 - b) Development of erythrocytes
 - c) Site and stages indevelopment
 - d) Necessaryfactors
 - e) Regulation of development oferythrocytes
 - f) Life-span and fate of erythrocytes
 - g) Erythrocytes sedimentation rate (ESR)

4. **Haemoglobin**
 - a) Structure, synthesis, function and metabolism
 - b) Types of hemoglobin
5. **Anaemia** – Definition and classification
6. **Jaundice** – Definition and classification
 - a) Role and function of spleen
7. **Leucocytes**
 - a) Classification, morphology, development and functions
 - b) Variation in health and disease
8. **Thrombocytes**
 - a) Origin, morphology and functions
 - b) Variation in health and disease Haemostasis
 - c) Mechanism of haemostasis, coagulation of blood
 - d) Fate of clot and disorders of clotting
9. **Anticoagulants**
 - a) Mechanism of action and clinical applications
10. **Blood Groups**
 - a) Classification
 - b) ABO and Rh system
 - c) Blood transfusion, indication and hazards
11. **Lymph and tissue fluids**
 - a) Lymph and reticular system
 - b) Fluid compartments and Water Balance
 - c) Principles of immune system
 - d) Cellular and humoral immunity

III. **CARDIO-VASCULAR SYSTEM**

Historical perspective and organization of cardiovascular system

1. **Heart**
 - a) Structure and properties of cardiac muscle
 - b) Cardiac metabolism
 - c) Innervation of heart, junction tissue of heart
 - d) Regeneration and spread of cardiac impulse
2. **Electrocardiography**
 - a) Einthoven's Law
 - b) Various ECG leads, normal ECG and its interpretation
 - c) Cardiac arrhythmias and heart block

d) Cardiacvector

3. Cardiaccycle

- a) Pressure and volume change (mechanicalevents)
- b) Heart sound andstethoscopy
- c) Principle ofecho-cardiography
- d) Measurement and regulation of cardiacoutput.

4. Heart sounds

- a) Description, causation and relation to other events in cardiaccycle
- b) Clinical significance of heartsounds

5. Blood pressure

- a) Definition, regulation and factors influencingB.P.
- b) Measurement of bloodpressure
- c) Physiology of haemorrhage andshock

6. Circulation

- a) Blood vessels
- b) Physical principle of blood flow, regulation of bloodflow
- c) Jugular venous pulse tracing, radial pulsetracing
- d) Coronary, cerebral, renal and pulmonarycirculation
- e) Splanchnic, cutaneous and capillarycirculation

IV. RESPIRATORY SYSTEM

Introduction, internal and external respiration, physiological anatomy of respiratory system.

1. Mechanics ofrespiration

- a) Inspiration andexpiration
- b) Role of respiratory muscles and thorasiccage
- c) Pressure and volume change duringrespiration
- d) Work of breathing, lung compliance and its significance in health and diseases.

2. Lung volumes andcapacities

- a) Lung volumes and capacities and theirmeasurements
- b) Respiratory minute volume and maximum voluntaryventilation

3. Alveolar ventilation Composition of atmospheric, inspired, alveolar and expiredair.

4. Pulmonarycirculation

- a) Pulmonary circulation, ventilation-perfusionrelationship
- b) Diffusion of gases across pulmonarymembrane
- c) Oxygen uptake, transport anddelivery

- d) Carbon-dioxide uptake, transport and delivery
- 5. Organization of the respiratory centers
 - a) Nervous and chemical regulation of respiration
 - b) Classification and characteristics of hypoxia, cyanosis, asphyxia, hypercapnea, hypocapnea, dyspnoea, apnoea and orthopnea and periodic breathing.
 - c) Respiratory aspects of high altitude
 - d) Physiology of acclimatization and hyperbarism
 - e) Respiratory / pulmonary function tests
 - f) Non-respiratory functions of lungs
 - g) Artificial respiration

III DIGESTIVE SYSTEM

- 1. Introduction, organization and plan of digestive system
- 2. **Saliva**
 - a) Composition, functions, regulation of secretion
 - b) Methods of study of above aspects of saliva
- 3. **Stomach**
 - a) Functions of stomach
 - b) Composition and functions of gastric juice
 - c) Regulation of secretion and mechanism of HCL secretion
 - d) Gastric emptying time and its regulation
 - e) Methods of study of gastric function and its applied aspect.
- 4. **Pancreas**
 - a) Composition and functions of pancreatic juice
 - b) Regulation of pancreatic secretion
 - c) Methods of study of pancreatic secretion
- 5. **Liver**
 - a) Function, formation, storage and emptying of bile
 - b) Composition, function and regulation of release of bile
 - c) Entero-hepatic circulation
 - d) Tests for liver functions
- 6. **Small intestine**
 - a) Succus entericus
 - b) Composition, function and mechanism of secretions
- 7. **Large intestine**
 - a) Functions
- 8. **Gastro-intestinal Hormones**

- a) Release and functions
9. **Gastro-intestinal movements**
 - a) Mastication, deglutition and vomiting
 - b) Movements of stomach and small intestines
 - c) Movements of large intestine and defecation
 - d) Regulation of movements and methods of study
10. Digestion and adsorption of carbohydrates, fats, proteins and vitamins, minerals and water.

COURSE OUTCOME-

After completion of the program, the student will be able to:

1. Illustrate the normal functioning of all the organ systems and their interactions for well co-ordinated body function;
2. Correlate the relative contribution of each organ system to the homeostasis;
3. Describe the physiological aspects of normal growth and development;
4. Analyze the physiological response and adaptations to environmental stresses;
5. Classify physiological principles underlying pathogenesis and disease management.

Assessment Scheme:

Theory	– 70 Marks
Internal Assessment	– 30 Marks

PHYSIOLOGY PAPER- 2

VI. EXCRETORY SYSTEM

1. General introduction organs of excretion with special emphasis on evolution of excretory mechanisms
2. Renal system-functional anatomy and renal circulation
3. **Nephron**
 - a) Mechanism of urine formation, glomerular filtration, tubular function
 - b) Concentration and acidification of urine
 - c) Composition of normal urine, and abnormal constituents of urine
 - d) Renal function tests
4. Non-excretory functions of kidney
 - a) Physiology of micturition and its abnormalities
5. Skin-Structure and functions

VII. ENDOCRINAL SYSTEM

1. Introduction-hormones, evolutionary back-ground and organization of endocrine control systems
2. Methods of study
 - a) Classification of hormones and mechanism of hormonal action

- b) Regulation of hormone secretion and feed-backsystem
- 3. Hypothalamo- hypophyseal system Releasing hormones
- 4. Activeprinciples
 - a) Chemical nature, biosynthesis, role ofaction
 - b) Control of secretion, excretion and itsaspect.
 - c) Clinical study of their hypo-and hyperfunction
 - d) Laboratory diagnosis of pituitary (anterior and posterior) gland, thyroid, parathyroid, adrenal cortex and medulla and islets of langerhans.

VIII. REPRODUCTIVE SYSTEM

- 1. Physiology ofreproduction
 - a) Introduction to physiology ofreproduction
 - b) Sex determination and sex differentiation and chromosomalstudy
- 2. Male reproductivesystem
 - a) Growth, development and structure oftestes
 - b) Gonadotropins and gonadalhormones
 - c) Functions of testes and spermatogenesis
 - d) Composition of semen
- 3. Female reproductivesystem
 - a) Ovary,gonadotropins
 - b) Structure of ovary and corpusluteum
 - c) Function of ovary, ovarianhormones
 - d) Physiology of menstruation cycle and physiology ofpregnancy
 - e) Physiology of placenta, gestation andparturition
 - f) Physiological basic of tests for ovulation andpregnancy
- 4. Physiology oflactation

IX. NERVE MUSCLE PHYSIOLOGY

- 1. Neurons
 - a) Morphology and measures of excitability
 - b) Classification and properties of nervefibers
- 2. Muscle
 - a) Types of muscles and their properties andmorphology
 - b) Neuro-muscular junction, excitation-contractioncoupling
 - c) Myastheniagravis
 - d) Starlings law and its applications

X. CENTRAL NERVOUS SYSTEM

- 1. Structural and functional organization of central nervoussystem
- 2. Neuron
 - a) Neuroglia, functional types ofneurons

3. Cerebro-spinal fluid
 - a) Formation, circulation, functions of CSF
 - b) Methods of collection and clinical significance of CSF
4. Synapse
 - a) Types of synapses and their structure
 - b) Sympathetic transmission
 - c) General properties of neuro-transmitters
5. Sensory Physiology
 - a) Classification and general properties of receptors
 - b) Sensory modalities and stereognosis
6. Reflexes
 - a) Reflex and general properties of reflexes (with examples)
7. Ascending tracts
 - a) Origin, course, termination and functions
 - b) Specific reference to pain pathway and physiology of pain
8. Organisation of motor systems
 - a) Pyramidal and extra-pyramidal system
 - b) Upper and lower motor neurones and their lesions
 - c) Brown-Sequard syndrome
 - d) Syringomyelia
9. Cerebellum
 - a) Functional anatomy, connections and functions
 - b) Effects of lesions and tests for cerebellar function
10. Basal ganglion
 - a) Functional anatomy, connections and functions
 - b) Diseases of basal ganglion and its clinical evaluation
11. Vestibular apparatus
 - a) Functions anatomy, connections and functions
 - b) Effects of lesions and their assessment
 - c) Physiology of maintenance and regulation of muscle tone, posture and equilibrium
 - d) Decerebrated rigidity and righting reflexes
12. Thalamus
 - a) Functional anatomy, connections and functions
 - b) Effects of lesions of thalamus
13. Hypothalamus
 - a) Functional anatomy, connections and functions

- b) Effects of lesions of hypothalamus
- 14. Body temperature regulation
 - a) Normal body temperature, pyrexia and hypothermia
- 15. Cerebral cortex
 - a) Functional anatomy
 - b) Methods of study of cortical functions
- 16. Limbic system
 - a) Functional anatomy, connections and functions
 - b) EEG, Physiology of sleep and wakefulness
- 17. Higher functions
 - a) Learning, speech, memory, behaviour and emotions

XI. AUTONOMIC NERVOUS SYSTEM

- 1. Sympathetic nervous system
- 2. Parasympathetic nervous system

XII. SPECIAL SENSE

- 1. Smell
 - a) Physiology of olfaction and olfactory discrimination
 - b) Olfactory pathway and defects of olfaction
- 2. Receptors, primary taste sensation and taste pathway
- 3. Vision
 - a) Functional anatomy of eye, extra and intra-ocular muscles
 - b) Errors of refraction and their correction, visual acuity
 - c) Physiology of aqueous humour
 - d) Cornea, lens, intraocular pressure, accommodation
 - e) Retina, rhodopsin cycle, dark and light adaptation
 - f) Visual pathway and effects of lesions in visual pathways
 - g) Field of vision, perimetry, binocular vision
 - h) Iris and pupillary reflexes
 - i) Colour vision, colour blindness and tests for colour blindness
 - j) Formation and circulation of tears, lacrimal glands
- 4. Hearing
 - a) Functional anatomy of ear, function of external ear
 - b) Physiological functions of middle ear
 - c) Impedance matching and tympanic reflex
 - d) Functional anatomy of internal ear, cochlea, organ of Corti
 - e) Auditory pathway and auditory cortex
 - f) Frequency analysis, sound localization, defects of hearing
 - g) Audiometry, tests for conduction defects, Aphasia

Note: For the purpose of written Theory examination, the syllabus is divided as follows:

Theory Paper-I

Section-A: Consisting of chapters on General physiology, Blood, Cardio-vascular system, Respiratory system and Digestive system.

Theory Paper- II

Section-B: Consisting of chapters on excretory system, Endocrine system, Reproductive system (male and female), Nerve muscle physiology, Central nervous system, Autonomic nervous system and Specialsenses.

COURSE OUTCOME

After completion of the program, the student will be able to:

1. Explain the normal functioning of all the organsystems and their interactions for well co-ordinated bodyfunction;
2. Correlate the relative contribution of each organ system to thehomeostasis;
3. Describe the physiological aspects of normal growth anddevelopment;
4. Illustrate the physiological response and adaptations to environmental stresses;
5. Analyse physiological principles underlying pathogenesis and disease management.

Assessment Scheme:

Theory – **70 Marks**

Internal Assessment – **30 Marks**

PHYSIOLOGY PRACTICAL

I. HAEMATOLOGY EXPERIMENTS

1. Collection of blood, study of fresh drop of blood, effects of isotonic, hyper tonic and hypo tonic saline on RBCs
2. Enumeration of RBCs (RBScount)
3. Estimation of haemoglobin
4. Packed cell volume (PCV) and bloodindices
5. Determination of Erythrocyte sedimentation rate(ESR)
6. Enumeration of WBC (Totalcount)
7. Differential WBC count (Differentialcount)
8. Determination of clotting time and bleedingtime
9. Enumeration of platelets (Plateletcount)

II. HUMAN PHYSIOLOGYEXPERIMENTS

1. Recording of blood pressure in human beings and study the effects of exercise on bloodpressure
2. Electrocardiography (Demonstrations)
3. Clinical examination of CVS and radialpulse
4. Determination of tidal volume, inspiratory reserve volume, expiratory reserve volume, inspiratory capacity, expiratory volume (All experiments are to be arranged fordemonstration)
5. Stethoscopy, normal body temperature and its physiologicalvariation
6. Pulse, respiration and temperature chart withcorrelation

7. Clinical examination of respiratory system
8. Plethysmography (Demonstration)
9. Clinical examination of CNS
 - a) Motor functions
 - b) Sensory functions
 - c) Cranial nerves
 - d) Reflexes superficial and deep
10. Determination of vital capacity and maximum ventilator volume with spirometry (Demonstration)

Note:- The above 10 human physiology experiments are to be conducted with demonstration as a joint venture by physiologists and the clinical faculty, if necessary.

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

Recommended Text Books for Physiology

1. Text book of Medical physiology by A.C. Guyton
2. Review of Medical physiology by W.F. Ganong
3. Concise text book of Medical physiology by S.K. Choudhary
4. Understanding Medical physiology by Bijlani
5. Essentials of Medical Physiology by Sembulingam

Reference Books

1. Best and Taylor's physiology basis of Medical practice
2. Practical physiology by Ghai
3. Practical physiology by Ranade.

COURSE OUTCOME

After completion of the program, the student will be able to:

1. Conduct experiments designed to study physiological phenomena;
2. Interpret experimental/investigative data;
3. Differentiate between normal and abnormal data from results of tests, which he/she has done and observed in the laboratory.
4. Demonstrate the practicals efficiently.

3. BIOCHEMISTRY

Course type- Core Course

Course code – BNY 107, BNY 108P

Credits- 4

Objective:

The objectives of introducing biochemistry to the undergraduate students is to make them understand the scientific basis of the life processes at the molecular level and to orient them towards the

application of the knowledge in solving clinical problems.

BIOCHEMISTRY THEORY

1. Introduction and Prospects.
2. Hydrogen ion concentration, acids, bases, buffers, Henderson - Haselbasch Equation.
3. Principles of calorimetry, Paper chromatography and Electrophoresis.
4. Amino Acids - Classification, structure, properties and side chains of amino acids.
5. Peptides - Biological importance of peptides structure of Insulin.
6. Proteins - Definition, Biological importance, classification and properties, structure of proteins, coagulation and denaturation of proteins,
7. Elementary aspects of the structure of collagen, Myoglobin and Hemoglobin.
8. Enzymes - Definition, classification, specificity, coenzymes, co-factors and activators diagnostic importance of enzymes and iso-enzymes.
9. Carbohydrates-Definition, classification and biological importance of Monosaccharides-classification, properties and stereoisomerism, oligosaccharides-importance of Disaccharides.
10. Polysaccharides - Functions.
11. Lipids - Definition, classification and biological importance.
 - a) Simple lipids: Composition of triglycerol, Waxes.
 - b) Compound lipids: Functions of fatty acids - Properties of saturated and unsaturated fatty acids.
12. Nucleic acids - Definition, classification, composition and biological importance of nucleic acids, purines and pyrimidine bases. "Structure of DNA Structure, function and types of RNA..
13. Vitamins -Definition and classification. Brief account of source, biochemical function deficiency diseases. Vitamin antagonist Hypervitaminosis
14. Minerals-Calcium, Phosphorous, iron, copper, zinc, magnesium, manganese, lead, mercury arsenic and metal toxicity fluorine and iodine.
15. Cell and subcellular structures: Cell membrane, its composition, function of subcellular structures, transport across cell membrane, Active and facilitated diffusion.
16. Metabolism-Digestion and absorption of carbohydrates, lipids, proteins and nucleic acids.
17. Carbohydrate Metabolism-Glycogenesis, glycogenolysis and kreb's cycle, glycolysis, pyruvate oxidation citric acid cycle, Gluconeogenesis, Metabolism of Fructose and Galactose, regulation of metabolic pathways, disorders of carbohydrate metabolism, regulation of blood sugar, glucose tolerance test, diabetes mellitus.
18. Biological oxidation - Oxidative phosphorylation.
19. Lipid Metabolism -Lipogenesis, synthesis of fatty acids, de-saturation, Phospholipids, Bio-synthesis of lecithine, Cephalin and utilisation of Ketone bodies, Ketosis, synthesis and utilisation of ketone bodies, Ketosis, synthesis and breakdown of cholesterol, disorders of lipid metabolism, outlines and formation and functions of prostaglandins and leucotrienes, fatty liver and lipotropic factors.
20. Metabolism of proteins and amino acids - Breakdown of tissue proteins, amino acids pool, general metabolism of amino acids, disposal of ammonia, urea cycle formation of glutamate and glutamine, disorders of amino acid metabolism.
21. Purine and Pyrimidine metabolism-Outline of synthesis and breakdown of purine and pyrimidine, Disorders of metabolism of purine and pyrimidine.

22. Biochemical genetics and protein synthesis - Replication, transcription, reverse transcription viruses, oncogenes, post transcription modification.
23. Biochemistry of blood - Outline of synthesis and degradation of heme, Function of Haemoglobin, abnormal haemoglobin, Jaundice, importance, functions and separation of plasma proteins, Functions of immunoglobulins, regulation of PH of blood, role of kidney and lungs in maintaining PH of blood, acidosis and Alkalosis.
24. Liver function - Liver Function tests, Detoxification mechanisms.
25. Kidney Function Tests - Composition of Urine, Urea clearance and creatinine clearance.
26. Energy metabolism (BMR) - Basal metabolic rate and its importance, calorific values of blood, unbalanced diet, protein energy malnutrition (PEM) , Essential fatty acids , dietary habits and diseases, biochemistry of starvation.
27. Electrolytes and water metabolism.

COURSE OUTCOME-

After completion of the course, the student shall be able to:

- a) Explain the molecular and functional organization of a cell and list its sub cellular components;
- b) Correlate the fundamental aspects of enzymology and clinical application wherein regulation of enzymatic activity is altered;
- c) Illustrate digestion and assimilation of nutrients and consequences of malnutrition;
- d) Explain biochemical basis of inherited disorders with their associated sequelae;
- e) Describe mechanisms involved in maintenance of body fluid and pH homeostasis;
- f) Analyse the molecular mechanisms of gene expression and regulation, the principles of genetic engineering and their application in medicine

Assessment Scheme:

Theory	– 70 Marks
Internal Assessment	– 30 Marks

Biochemistry Practicals

SECTION – I

1. Indicators
2. Reactions of monosaccharides - Glucose and fructose
3. Reactions of disaccharides - Lactose, Maltose and Sucrose
4. Reactions of polysaccharides - Starch and dextrin
5. Reactions of Proteins - albumin, casein, gelatin
6. Coagulation and Precipitation and reactions of Proteins.
7. Reactions of Non Protein Nitrogen (NPN) - Urea, Uric acid and creatinine.
8. Analysis of Milk
9. Normal Constituents of urine
10. Analysis of abnormal urine.

SECTION –II

1. Determination of

- a. Blood Sugar
- b. Blood urea
- c. Total serum protein
- d. Total serum calcium
- e. Total serum cholesterol
- f. Total serum bilirubin
2. Determination of
 - a. Sugar in CSF
 - b. Proteins in CSF
 - c. Chlorides in CSF
3. Determination of albumin and urea in urine
4. Determination of SGOT and SGPT
5. Demonstration of principles of
 - a. Calorimetry and calorimeter
 - b. Paper chromatography
 - c. Electrophoresis
 - d. Glucose Tolerance Test (GTT)
 - e. Flame photometry.

COURSE OUTCOME

At the end of the course, the student will be able to:

1. Demonstrate conventional techniques/instruments to perform biochemical analysis relevant to clinical screening and diagnosis;
2. Analyse and interpret investigational data;
3. Demonstrate the skills of solving scientific and clinical problems and decision making.
4. The integrated knowledge of biochemistry will help the students to integrate molecular events with the structure and function of the human body in health and disease.

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

Note:

1. Section - I of practicals shall be conducted by students in biochemistry laboratory.
2. Section - II of practicals shall be conducted by teaching staff as a part of demonstration/seminar in the laboratory.

Recommended Text Book for Biochemistry

- | | |
|--------------------------------------|-------------------------------------|
| 1. Text book of Biochemistry | - By Ramkrishna, Prasanna and Rajan |
| 2. Biochemistry for medical students | - By Debajyoti Das. |

4. PHILOSOPHY OF NATURE CURE

Course type- Core Course

Course code – BNY 109, BNY110, BNY111P

Credits- 11

Objectives:

The objectives of introducing philosophy of Naturopathy to the undergraduate students is to make them understand philosophical basis of the system of Naturopathy, including concepts of health, causes and pathogenesis of disease and brief introduction to the various therapeutic modalities used in Naturopathy.

THEORY PNC PAPER -1

1. The evolution of the human body.
2. Philosophy of the body, mind, soul, life, spirit and spiritual body.
3. (a) Composition of the human body, according to Ayurveda, Naturopathy, Yoga, Modern Medicine & Homeopathy.
(b) History and Fundamental (Basic) principles of Naturopathy.
4. Comparative study of the Naturopathy with other systems of Medicine.
5. Ayurvedic Approach towards Naturopathy.
6. Philosophy of Indian Naturopaths
 - Vegiraj Krishnamraju
 - Vinoba Bhave.
 - Mahatma Gandhi.
 - Dr. S.J.Singh
 - Dr.J.M.Jussawala
 - Dr. Vittal Das Modi
 - Dr.B.Venkat Rao
 - Dr. Dinsha K.Mehta
 - Dr.KulranjanMukherjee
 - Dr. K. LaxmanSharma
7. Philosophy of Foreign Naturopaths

1. Aesculapius	11. Hippocrates
2. The School of Salerno.	12. Paracelsus

- | | |
|------------------------|-----------------------|
| 3. Vincent Priessnitz. | 13. Sebastian Kneipp. |
| 4. Arnold Rickli. | 14. Louis Kuhne. |
| 5. Adolf Just. | 15. John H.Tilden. |
| 6. SigmundFreud. | 16. Henry Lindlahr. |
| 7. Bernarr Macfadden | 17. Bernard Jenson |
| 8. Arnold Ehret | 18. Edwin Babbitt |
| 9. Herbert M. Shelton | 19. J.H. Kellogg M.D. |
| 10. Benedict Lust | |
8. Laws of Nature:
- Pancha MahaBhutas.
 - Shareera Dharmas - Ahara, Nidra, Bhaya, Maithuna.
 - Inflammation and its differentstages.
 - Natural rejuvenations.
 - Violations of Laws of Nature resulting indiseases
 - Dictum of Cure
 - i) Remove the root cause
 - ii) Eliminate the toxin
 - iii) Supplement of the vital Nutrients
 - iv) Conservation of the vital energy or nerveenergy.
9. Catechism of NatureCure
10. Swasthya Vritam:
- | | |
|----------------|-----------------|
| a. Dinacharya. | b. Ratricharya. |
| c. Ritucharya. | d. Vegadharanam |
11. Unity of disease, unity of cure and way of treatment.
12. How Nature Cures?
13. Foreign matter and Toxins accumulation in the body and its importance in elimination through different ways of channels. (Toxemia / Foreign Matter Theory).
14. How to acquire Natural immunity indiseases
15. Difference between functional and organicdiseases.
16. Materia Hygienica
- a) Importance of Physical & Mental Hygiene
 - b) Revolution & Evolution of Hygiene
 - c) Hygiene not acure
 - d) Hygienic care of the sick
 - e) Applications of Hygiene
 - f) Medicine & the Hygiene contrasted
 - g) Women & Hygiene
 - h) Hygienists
 - i) Future of Hygiene

17. The Philosophy of Life:-
 - a) The Primordial Requisites of Life (Basic Needs of Living)
 - b) The Laws of life.
 - c) Mystery of life
 - d) Life's Engineering
 - e) Safeguards of life.
 - f) How long can we live (Increase of average length of life), are You Shortening Your Life? Why Live Long?

18. The Philosophy of Health
 - a) Health Standards
 - b) Health & its Conditions
 - c) Ancient Man Was Healthier Than We Are.
 - d) Positive Habits
 - e) Vital Economy
 - f) Divine science of Health.
 - g) Nine Doctors at your Command.
 - h) Health Destroyer (Tea, Coffee, Salt, Sugar, Tobacco Chewing, Smoking, Alcohol, Non-Veg (Animal Food), Excess Fat & Oil, Negative Thinking & attitude etc.)
 - i) The Secret of Health - Storing Energy & Enzymes
 - j) Internal Symbiosis
 - k) Your Body: Do- it Yourself Repair Shop

19. The Philosophy of Disease in Nature Cure:
 - a) The Essential Nature of Disease
 - b) The Occasions for Disease
 - c) The Suppression of Disease
 - d) Is Disease Friend or Foe?
 - e) The Rationale of Fever
 - f) Disease has Many Faces
 - g) You under the Doctor's Eye
 - h) Fallacy of Diagnosis
 - i) Iatrogenic Diseases
 - j) Physiological Compensation.

20. The Cure Core In Nature Cure:-
 - a) Living Matter Cures Itself.
 - b) Reform Vs. Cure
 - c) The Delusion of Cure
 - d) To Cure The Incurable.
 - e) Rest Cure

COURSE OUTCOME-

After completion of the course, the student shall be able to:

1. Illustrate the history of Naturopathy including major contributors to the field and their work;

2. Correlate the evolution and composition of the human body according to different schools of medicine such as Naturopathy, *Yoga*, *Ayurveda*, Homeopathy, Modern Medicine, etc.
3. Concepts of health and disease according to Naturopathy
4. Classify and Correlate Ten basic principles of Naturopathy
5. Describe Foreign matter, toxin accumulation, theory of Toxemia, Unity of disease and Unity of Cure.

Assessment Scheme:

Theory – 70 Marks

Internal Assessment – 30 Marks

PNC PAPER –II

1. Properties of Water, Mud, Air and Sunlight.
2. Health is positive and disease is Negative.
3. Basic concepts in Nutrition and balanced diet.
4. Role of diet in nature cure and yoga (Satvic, Tamsic, Rajsic)
5. Outlines on a) Regular Habits for health b) Rest and Relaxation c) Live Food- Natural Raw diet d) Fasting e) Exercises.
6. Fundamentals of Ayurveda
7. Fundamental of Siddha
8. Fundamentals of Homeopathy
9. Fundamentals of Unani
10. Fundamentals of Allopathy
11. The Diagnostic Procedures in Naturopathy & their Diagnostic Values:
 - a. Facial Diagnosis-The Science Of Facial Expression
 - b. Iridiagnosis
 - c. Chromo-Diagnosis
 - d. Spinal Analysis.
 - e. Arogya-Rakshaka Panchatantras and Their Importance in Restoration, Maintenance Of Health And Prevention Of Diseases.
12. Treatment Modalities in Nature Cure (in brief):
 - a.
 - i) Enema - Colon Flushing
 - ii) Colon Hydrotherapy. Hydrotherapy:
 - b. Hydrotherapy:
 - c. Hip Bath
 - i. Spinal Bath
 - ii. Spinal Spray
 - iii. Foot Bath
 - iv. Arm Bath
 - v. Contrast Arm & Foot Bath
 - vi. Steam Bath
 - vii. Sauna Bath
 - viii. Packs
 - ix. Full Wet Sheet Pack
 - x. Jacuzzi
 - xi. Sitz Bath

- xii. Full Immersion Bath
- xiii. Under Water Massage
- xiv. Douches
- xv. Cold Circular Jet Bath
- xvi. Whirlpool Bath
- xvii. Gastro Hepatic Pack
- xviii. KidneyPack
- xix. Oxygen Bath
- d. Mud Therapy: i) Mud Packs ii) Mud Bath.
- e. Chromotherapy:- ColourTreatment
 - i. Heat, Light, Ultra-violet and Infra redrays
 - ii. Chromothermolium.
 - iii. Heliotherapy
 - iv. Sun Bath
 - v. Athapa-Snana(Banana Leaf Bath)
- f. Air-therapy
 - i) Air Bath
 - ii) OzoneBath
 - iii) Magnetotherapy
- g. Massage Therapy
- h. Aroma Therapy
- i. Chiropractice
- j. Osteopathy
- k. Physiotherapy
- l. Nutrition & Dietetics.
- 13. Crises and their Management.
- 14. Sleep - Repose.
- 15. Toxins and anti-toxins, their generation & mitigation in nature cure way.
- 16. Vaccinations and inoculation, their ill effects on the human mind and body.
- 17. Old age problems and natural rejuvenation.
- 18. Family planning by Natural therapeutics.

COURSE OUTCOME-

After completion of the course, the student shall be able to:

1. Explain the history of Naturopathy including major contributors to the field and their work;
2. Correlate the evolution and composition of the human body according to different schools of medicine such as Naturopathy, *Yoga*, *Ayurveda*, Homeopathy, Modern Medicine, etc.
3. Analyse naturopathic viewpoints of concepts like hygiene, vaccination, family planning, personal life and prevention of diseases, geriatrics, etc, and implement them in his/herpractice
4. Analyse Principles behind using the diagnostic procedures of Naturopathy, like spinal diagnosis, facial diagnosis, iris diagnosis, and chromodiagnosis.
5. Demonstrate knowledge of recent advances and research in Naturopathy principles/theories.

Assessment Scheme:

Theory	– 70 Marks
Internal Assessment	– 30 Marks

PNC PRACTICALS

- a. Students should be introduced to various treatment procedures used in Naturopathy.
- b. Students should have knowledge of giving various treatments.
- c. Demonstration of:
 - i) Natural Diet (Live food).
 - ii) Satvic boiled diet.
 - iii) Way of serving & various special diets.
- d. Practicals with record. v. Visiting to various nature cure clinics/ hospitals.

COURSE OUTCOME-

After completion of the course, the student shall be able to:

1. Understand Principles behind using the diagnostic procedures of Naturopathy, like spinal diagnosis, facial diagnosis, iris diagnosis, and chromo diagnosis.
2. Demonstrate knowledge of recent advances and research in Naturopathy principles/theories.
3. Demonstrate basic knowledge of the various therapeutic modalities utilised in Naturopathy;
4. Describe the various principles of Naturopathy with respect to the body, health, disease and therapy, diagnosis and management

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

5. YOGA PRACTICES

Course type- Core Course Course code – BNY 112, BNY 113P

Credits- 8

Objective:

The objective of teaching *Yoga* to undergraduate students is to familiarize them with basic principles of *Yoga* with respect to history, definitions, philosophy and practices of *Yoga*, with emphasis of *Ashtanga Yoga*.

THEORY

1. Different definition of yoga, its philosophy & origin.
2. Fundamental outlines of Astanga Yoga.
 - a) Yama
 - b) Niyama
 - c) Asanas : Shirshasana, Vajrasana, Supta Vajrasana Paschimottanasana, Baddha Padmasana, Trikonasana, Ardhakati and Kati Chakrasana, Padahastanasana, shavasana,
 - d) Pranayama-Suryabhedana, Ujjayi, Bhastrika, Sheetkari, Sheetali, Bhramari, Murcha, Plavini.
 - e) Prathyahara
 - f) Dharana
 - g) Dhyana
 - h) Samadhi
3. Kriyas
 - i) Neti Jal Sutra Ghrita
 - ii) Dhouti Vamana
Vastra
Danda
 - iii) Nauli Madhya
Dakshina & Vama
 - iv) Trataka Bindu
Jyoti
 - v) Kapalabhati
4. Rules & regulations to be followed for practising asanas, difference between exercise and asanas.

5. The life sketches, philosophy of Socrates, Plato, Aristotle, Adisankaracharya, Ramanujan, Maharshi Dayananda Saraswati, Ramakrishna Paramahansa, Swami Vivekananda, Swami Kuvalyanada, Ramana Maharshi, A.C. Bhakti vedanta Prabhupada, Jiddu Krishna Murthy, Shirdi Saibaba, Buddha, Mahavir, Shri Aurabindo, Sant Hirdaram Sahibji, Swami Lilashah, Sant Kanwarram

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

1. Explain the various definitions of *Yoga*, history of *Yoga* and branches of *Yoga* ;
2. Describe kinds of *Yogasanas*, its importance, methods, rules, regulations and limitations;
3. Illustrate the various limbs of *Ashtanga Yoga*;

Assessment Scheme:

Theory – **50 Marks**

Internal Assessment – **15 Marks**

Yoga Practicals

Asanas

Kriyas

Pranayama

Dharana

Dhyana-Meditation

Practicals with records.

ASANAS

- A. Standing Postures
 1. Tadasana
 2. Ardhakati Chakrasana
 3. Padahastasana
 4. Ardha Chakrasana
 5. Kati Chakrasana
 6. Trikonasana
- B. Supine Postures
 1. Shavasana
 2. Matsyasana
 3. Sarvangasana
 4. Halasana
 5. Chakrasana
 6. Pawanmuktasana.
- C. Prone Postures
 1. Makarasana
 2. Bhujangasana
 3. ArdhaShalabhasana
 4. Shalabhasana
 5. Dhanurasana
- D. Sitting Postures
 1. Vakrasana

2. Ardhamatsyendrasana
3. Paschimottanasana
4. Ustrasana
5. Vajrasana
6. Padmasana
7. BaddhaPadmasana
8. Supta Vajrasana Pranayama
1. Kapalbhati
2. Bhastrika
3. Sheetakari
4. Sheetal
5. Anuloma Viloma
6. Ujjayi
7. Bhramari
8. Plavani Kriyas
1. Neti - Jala -Sutra
2. Dhouti -Vaman
3. Nauli - Dakshina -Madhya
4. Trataka -Jyoti
5. Kapalbhati

COURSE OUTCOME

After the completion of the course, the student shall be able to:

1. Demonstrate knowledge of *pranayamas*, *prana* and lifestyle, breathing and lifespan.
2. Demonstrate various types of *Yogasanas* in their correct method of performance;
3. Demonstrate different *pranayamas*.
4. Explain about the definitions, origin, branches of *Yoga*.

ASSESSMENT SCORE PRACTICAL SCORE- 20 INTERNAL ASSESSMENT - 15

6. SANSKRIT

Course Type – Ability Enhancement Course (NON EXAM)

Course Code- BNY114

Objective:

- CO1 The objective of teaching *Sanskrit* to undergraduate students is to provide a comprehensive knowledge of *Sanskrit* in order to be able to study.
- CO2 Understands, comprehend and utilise the knowledge contained in Indian traditional texts in their professional practice, especially in the field of *Yoga*.

Theory

Basic Orientation

Knowledge of Devanagari script - alphabet, i.e. vowels, consonant vowel combination, two consonant combinations, special conjunct consonants and their pronunciation associated with their articulation.

Chapter 1

Verb roots, nine forms for three persons and three numbers; practice all the verb roots and their forms for correct pronunciation; usage of prefixes and how they change the meaning of the verb root and how to find them in the dictionary.

Chapter 2

Noun, masculine and neuter genders; 8 cases and their possible meanings; 24 forms of a noun and its declensions; practice of other similar declensions and usage of the 24 forms of a noun. Introduction to write a sentence; syntax, Prepositions and their definite requirements of cases; rule how, ra/sha "changes dental, n" to cerebral, N" and its exceptions for this rule; repeated declensions for pronunciation.

Chapter 3

Noun-feminine gender; both ā ending and i-ending and practice of similar declensions. Practice of writing sentences with words mainly in feminine gender; exercises mainly for the feminine gender illustration; special declensions where dental „n“ changes to cerebral „N“; repeat all feminine noun declensions.

Chapter 4

Madhurashtakam illustrating all the three genders of nouns and study of the adjectives, having all the three genders and changing according to the gender of different qualified nouns; Midterm examination.

Chapter 5

Ex 32-38 ; models of declensions; how to recognize a gender or find the gender using the dictionary and write declensions of new words according to their models of declensions, while applying the rule changing dental „n“ to cerebral, N“; making simple sentences for all the words given there; repeat vowel- ending model declensions.

Chapter 6

Exercises for appropriate use of the cases; irregular verbs; absence of verb root “to have” in Sanskrit; where to omit root „AS“ (to be), use of certain special verbs; repeat model declensions.

Chapter 7

Pronouns: Introduction to pronouns; declensions of pronouns; corresponding translations of pronouns

into English; forming sentences with pronouns; Different aspects of pronouns being used as demonstrative pronouns and as interrogative pronouns and details of distance specification.

Chapter 8

Sandhi explanation; three major kinds of Sandhi: Vowel-Sandhi, Visarga-Sandhi and Consonant-Sandhi, and fifteen exercises.

Parasmaipadi (P) and *Atmanepadi* (A) forms of verbs;

Verb and ten *Ganas*; how to find the *Gana* using the *Apte* Samskrta - English Dictionary

Verb and ten *Lakaras*; mastering five *Lakāras* of both *Parasmaipadi* and

Atmanepadi and doing the pertaining exercises for that.

Chapter 9

Vaidhyakeeyasubhashitasahityam:

Ragarogya vijñanam Vyayama vijñanam

Pranayama vijñanam Madhyagunadosha vijñanam.

Text Books:

Dr. Sarasvati Mohan, Samskrta Level-2, Samskrta Academy

Dr. Sarasvati Mohan, Samskrta-English-Samskrta Dictionary, Samskrta Academy.

Dr. Sarasvati Mohan, Samskrta Level-3, Samskrta Academy

Vaman Sivaram Apte, Samskrta-English Dictionary, Samskrta Academy

Reference Books:

Samskrtabhasadipika, Sri Surasaraswati Sabha (R) Sringeri, Bangalore, 2003.

7. English Communication

Course Type – Ability Enhancement Course,

Course Code - AECC 1

Credits: 1 (NON EXAM)

Objective

The purpose of commencing English communication skills course is to develop in students fundamental communication skills being integral to personal, social and professional interactions. One of the significant associations among human beings is the ability to share thoughts, emotions and ideas through various means of communication: both verbal and non-verbal. The present course hopes to address most of these aspects through an interactive approach of teaching learning process; focusing on various dimensions of communication skills. The course also focuses on enhancing the ability to handle casual and formed satiations in terms of personal and intellectual grooming.

SYLLABUS

Module 01 – Self Introduction

- Introducing self
- Speaking about achievements
- Voicing future aspects

Module 02 – Non verbal Communication

- Body Language

- Paralanguage skills

Module 03 – Manners and Etiquettes

- Personal grooming
- Dress code
- Telephone etiquettes
- Intellectual grooming

Module 04 – Conversation in Real life situations

- Meeting people,
- Traveling
- Visiting Places
- Shopping

Module 05 – Public Speaking skills

- Extempore
- Role Play
- Group Discussion

Module 06 – Basic Computer Skills

- Computers, Hardware & Software
- Internet, Emails and Search Engine
- MS Office
- Using Internet for Medical Research

Module 07 – Practical Assessment

- Presentations

COURSE OUTCOMES:

1. Projecting the first impression
2. Use simple forms of polite expressions to establish basic social contact and to perform everyday functions including making requests and offers, conducting simple phone conversations, asking and telling time, giving simple directions, asking about price, ordering a meal, etc.
3. Students learn to use general, social and professional language.
4. Polishing manners to behave appropriately in social and professional circles.
5. Handling difficulty situations with grace style and professionalism.

Books Recommended:

1. An introduction to Professional English and Soft Skills by B. K. Das et al., Cambridge University Press
2. Technical Communication: Principles and Practice, Second Edition by Meenakshi Raman and Sangeeta Sharma, Oxford Publications.
3. Effective Technical Communication by M Ashraf Rizvi, The McGraw-Hill companies.
4. Understanding Body Language by Alan Pease.

5. Communicative Grammar of English by Geoffrey Leech and Ian Svartik.
6. Better English Pronunciation by J.D.O'Connor.
7. English Grammar by Wren and Martin.
8. Strengthen Your English, M. Bhaskaran and D. Horsburgh, Oxford University Press, Delhi 1973.

SECOND YEAR 1.PATHOLOGY

Course type- Core Course Course code–BNY 201, BNY202P

Credits- 4

Objective:

The objective of teaching pathology to undergraduate students is to provide a comprehensive knowledge of the mechanisms and causes of disease, so that he/she is able to comprehend fully the natural history and clinical manifestations of disease.

THEORY

General Pathology

1. History and Scope of Pathology
 - a) Definition and various branches in Pathology.
 - b) Scientific study of disease and methodology.
2. The cell and the reaction of cell, tissue and organ to injury.
 - a) Structure of cell and its function.
 - b) Causes and nature of cell injury.
3. Reaction of cell to Injurious agents.
 - a) Lethal injury- Necrosis and gangrene.
 - b) Cloudy swelling.
 - i) Fatty changes in Liver, heart and kidney.
 - ii) Glycogen infiltration and hyaline degeneration.
 - iv) Lipoid degeneration.
 - v) Mucoid degeneration.
 - c) Pathological Calcification
4. Inflammation and Repair:
 - a) Definition, Classification and nomenclature.
 - b) Acute Inflammation.

Vascular and cellular phenomenon, cell of exudate chemical mediators and tissue changes in acute inflammation Cardinal signs of acute inflammation, Fat, types and systemic effects of acute Inflammation.
5. Chronic Inflammation :
 - a) Difference between acute and chronic inflammation.
 - b) Definition of Granuloma.
6. Wound healing:
 - a) Regeneration and Repair.
 - b) Repair of epithelial and mesenchymal tissue.
 - c) Primary union and secondary union.
 - d) Mechanism involved and factors modifying repair process.
7. Gangrene - Causes, Dry Gangrene, Moist gangrene, Gas gangrene

8. Granulomas:
 - a) Classification of granulomas.
 - b) Tuberculosis- Genesis and fate of tubercle, primary and secondary tuberculosis.
 - c) Definition, Classification and Pathology of Leprosy.
 - d) Acquired, Primary, Secondary and Tertiary stages of syphilis.
 - e) C.N.S.syphilis, C.V.S.syphilis and Gumma, congenital syphilis.
 - f) Actinomycosis, maduramycosis and rhinosporidiosis.
9. Fluid and Hemodynamic Changes (circulatory disturbances):
 - a) Hyperemia, congestion and hemorrhage.
 - b) Thrombosis, embolism, DIC.
 - c) Ischemia, infarction and shock.
 - d) .Edema.
10. Immunopathology:
 - a) Basic Pathological mechanism in auto immuned disorders.
 - b) Concept of immunodeficiency disorders.
 - c) Pathology of AIDS.
11. Growth and its disorders:
 - a) Definition ofagenesis, aplasia, atrophy, hyperplasia, hypertrophy, hypoplasia, metaplasia.
 - b) Concept of dysplasia, anaplasia and carcinoma-in-situ.
12. Neoplasia:
 - a) Definition, Classification and Nomenclature.
 - b) Characteristic features of benign and malignant tumours.
 - c) Route of spread of malignant tumours.
 - d) Grading and staging of cancers and pre-cancerous conditions.
 - e) Carcinogenesis and carcinogens.
 - f) Laboratory diagnosis of cancer-Biopsy, exfoliative cytology and prognostic prediction in cancer.
 - g) Description of common tumours like-Fibroma, Lymphoma, Angioma, Leiomyoma and Fibrosarcoma, Lymphosarcoma, Angiosarcoma and Leiomyosarcoma..
 - h) Tumours of infancy and childhood.
13. Mineral and pigment metabolism:
 - a) Pathology of melanin pigment
 - b) Pathology of hemoglobin and its derivatives
 - c) Hemosiderosis and hemochromatosis
14. Genetic disorders: Klinefelter's syndrome, Turner's syndrome, Down's syndrome.

SYSTEMIC PATHOLOGY

1. Disorders of RBC
 - a) Definition, morphologic and etio-pathologic classification of anemias. Iron deficiency anemia-B12 and folate deficiency anemia, sideroblastic anemia, post-hemorrhagic anemia.
 - b) Concept and classification of hemolytic anemias.
 - c) Laboratory investigations in anemia.
2. Disorders of WBC
 - a) Leukopenia & Leukocytosis.

- b) Agranulocytosis and Tropical Eosinophilia.
3. Coagulation and bleeding disorders
 - a) Structure, function and pathology of platelets.
 - b) Definition and classification of blood dyscrasias.
 - c) Laboratory investigations in bleeding disorders.
4. Diseases of Cardiovascular System
 - a) Arteriosclerosis and Atherosclerosis.
 - b) Aneurysm.
 - c) Rheumatic heart disease, Endocarditis, Myocardial Infarction.
 - d) Congenital heart diseases.
 - e) Congestive cardiac failure.
5. Diseases of Respiratory System
 - a) Lobar Pneumonia, bronchopneumonia, pulmonary Tuberculosis.
 - b) Bronchiectasis and Pneumoconiosis.
 - c) Tumors of lung.
6. Diseases of Gastro-intestinal system
 - a) Pleomorphic adenoma of salivary gland.
 - b) Barrett's Oesophagus.
 - c) Gastritis and peptic ulcer and tumors of stomach.
 - d) Inflammatory bowel diseases- Crohn's disease, ulcerative colitis, typhoid ulcer.
 - e) Megacolon and Tumors of colon.
 - f) Malabsorption syndrome, tropical sprue and Coeliac disease. Amoebiasis, bacillary
 - g) Myxenteria and intestinal tuberculosis.
7. Diseases of liver, biliary tract and pancreas:
 - a) Liver function tests and hepatic failure, viral hepatitis.
 - b) Cirrhosis of liver. tumors of liver.
 - c) Alcoholic liver diseases.
 - d) Indian childhood cirrhosis. E) cholecystitis and Gallstones.
 - f) Pancreatitis and Diabetes Mellitus.
8. Diseases of Kidney:
 - a) Renal function tests, Renal failure, Polycystic kidney.
 - b) Acute glomerulonephritis, Crescentic glomerulonephritis, Membranous glomerulonephritis, Nephrotic syndrome.
 - c) Chronic glomerulonephritis, acute tubular necrosis.
 - d) Pyelonephritis, Kidney in hypertension.
 - e) Tumors of Kidney.
9. Diseases of Male Genital system
 - a) Orchitis and testicular tumors.
 - b) Nodular hyperplasia of prostate, carcinoma of prostate.
 - c) Carcinoma of penis.
10. Diseases of Female Reproductive Systems
 - a) Endometrial hyperplasia, adenomyosis and endometriosis.
 - b) Carcinoma of cervix, tumors of ovary.
 - c) Carcinoma and other diseases of vulva and uterus.
11. Diseases of Breast
 - a) Fibrocystic disease and tumors of breast.
 - b) Gynaecomastia,

12. Endocrine Pathology
 - a) Endocrinal lesions in brief mainly stressing on thyroid and Pheochromocytoma.
13. Musculo-skeletal Pathology
 - a) Osteomyelitis and Osteoporosis.
 - b) Rickets and Osteoporosis.
 - c) Tumors of Bone.
 - d) Rheumatoid Arthritis, Gout.
 - e) Myasthenia gravis and Progressive muscular dystrophy.
14. Diseases of Nervous System
 - a) Meningitis, tumors of CNS.
 - b) Tumors of Peripheral Nerves.
 - c) Encephalitis.
15. Diseases of Lymph nodes and Spleen
 - a) Lymphadenopathy.
 - b) Malignant Lymphoma, basal cell carcinoma.
16. Pathology of Skin
 - a) Squamous cell carcinoma, Basal cell carcinoma.
 - b) Malignant melanoma.
 - c) Warts, Molluscum contagiosum.
 - d) Fungal diseases.
17. Pathology of Eye.
18. Pathology of ENT.
19. Clinical Pathology Including Clinical Hematology & Clinical Bio-Chemistry.
 1. Sample Collections for various hematological and clinical pathological investigations and anticoagulants used.
 2. Theoretical aspects of HB estimation; hematocrit, blood indices, ESR and normal values in Hematology.
 3. Blood grouping concept of blood groups.
 - a) Selection of donor, major and minor cross-matching.
 - b) Blood transfusion, diseases transmitted by transfusions.
 - c) Coombs' test.
 4. CSF Analysis.
 5. Semen Analysis.
 6. Urine analysis and microscopy.
 7. Liver Function tests.
 8. Renal function tests.
 9. Glucose tolerance test.
 10. Exfoliative cytology.

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

- a. Explain the structure and ultra-structure of a sick cell, mechanism of cell degeneration, cell death and repair and be able to correlate structural and functional alterations.
- b. Describe the pathophysiological processes which govern the maintenance of homeostasis, mechanisms of their disturbance and the morphological and clinical manifestations associated with it;
- c. Analyse the mechanisms and patterns of tissue response to injury such that he/she can

- d. appreciate the pathophysiology of disease processes and their clinical manifestations;
Correlate normal and altered morphology (gross and microscopic) of different organ systems in common diseases to the extent needed for understanding of disease processes and their clinical significance.

Assessment Scheme:

Theory – **70 Marks**

Internal Assessment – **30 Marks**

PATHOLOGY PRACTICALS

I. Hematology

1. Blood groups (A.B.O. System)
2. Estimation of hemoglobin.
3. Enumeration of RBCs (R.B.C. Count)
4. Total leucocyte count (total count)
5. Differential leucocyte count (D.L.C.)
6. Peripheral Smear staining and reporting
7. Absolute eosinophil count.
8. Demonstration of
 - a) Hemograms in anemia
 - i) Iron deficiency anemia
 - ii) Macrocytic anemia
 - b) Hemograms in Leukaemias
 - i) Acute types
 - ii) Chronic types
9. Slide study of:
 - a) Acute myeloid leukaemia
 - b) Chronic myeloid leukaemia
 - c) Chronic lymphatic leukaemia

II. SPOTTERS:

A. HAEMATOLOGY SLIDES

1. Microcytic Hypochromic Anaemia.
2. Macrocytic Anaemia.
3. Dimorphic Anaemia.
4. Acute Leukemia.
5. Chronic Myeloid and Chronic Lymphatic Leukemia.
6. Eosinophilia.

B. HISTO- PATHOLOGY SLIDES FOR DISCUSSION

1. Acute Appendicitis.
2. Lobar Pneumonia.
3. T. B. Lymphadenitis.
4. Lipoma, Fibroma, Squamous Papilloma.
5. Squamous Cell Carcinoma.
6. Adenocarcinoma,
7. Osteosarcoma, Osteoclastoma.
8. Pleomorphic Adenoma.
9. Teratoma, Seminoma of Dysgerminoma.

10. Cystoglandular Hyperplasia.
11. Proliferative Hyperplasia.
12. Secretory Endometrium.

C. INSTRUMENTS FOR SPOTTING

1. WintrobessTube.
2. Westergreen.
3. RBCpipette.
4. WBC Pipette..
5. Lumbar PunctureNeedle.
6. Liver biopsyNeedle.

III. MORBIDANATOMY

1. AcuteAppendicitis.
2. LobarPneumonia.
3. TBLung.
4. GastricUlcer.
5. CarcinomaStomach.
6. CarcinomaBreast
7. Atherosclerosis.
8. Dermoid Cyst ofOvary
9. SeminomaTestis.
10. ChronicPyelonephritis.

IV. CLINICALPATHOLOGY

1. Examination of urine for:
A) Sugar, Ketone Bodies.
B) Protein and Blood.
2. Semen Analysis
3. Pregnancy Tests.
4. Liver FunctionsTest.
5. Fractional Testmeal.
6. Glucose tolerance Test.

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

1. Elaborateonprinciples, procedures and interpretation of results of diagnostic laboratorytests;
2. Perform with proper procedure simple bed side tests on biological fluid samples like blood, urineetc.
3. Prepare investigation flow-charts for diagnosing and managing common diseases;
4. Identify biochemical and physiological disturbances indiseases;

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

Recommended Text Books for Pathology:-

- | | |
|----------------------------------|--------------------------------|
| 1. Pathological Basis of Disease | - By Robbins, Cotran and Kumar |
| 2. Text Book of Pathology | - By N.C.Dey |
| 3. Text Book of Pathology | - By Harsh Mohan |

Reference Books-

- | | |
|--|----------------------|
| 1. Text Book of Pathology | - By Anderson |
| 2. Systemic Pathology | - By Symmers |
| 3. Medical Laboratory Technology | - By Ramnik Sood |
| 4. Pathology | - By Boyd |
| 5. Oxford Text Book of Pathology | |
| 6. The science and fineart of Disease Process (Orthopathy) | - Herbert M. Shelton |

2. MICROBIOLOGY

Course type- Core Course Course code–BNY 203, BNY 204P

Credits- 5

1. OBJECTIVE:

The objective of teaching microbiology to undergraduate students is to provide a comprehensive knowledge of the natural history, mechanisms and causes of infectious disease, including etiology, pathogenesis, laboratory diagnosis, treatment and control of diseases in the community.

THEORY

1. General Bacteriology:

- Historical Introduction
- Morphology and Physiology of Bacteria.
- Sterilisation and Disinfection
- Cultivation of Bacteria
- Bacterial Growth and Multiplication
- Basic Principles of Bacterial Genetics

2. Immunology

- Infection and Immunity
- Immuno globulins and Immune Response
- Immune System and Antigen-Antibody Response
- Complement and other Serological Tests
- Hyper sensitivity
- Basic Principles of Auto-Immunity.

3. Systemic Bacteriology

Streptococcus, Staphylococcus and Pseudomonas, Gonococcus, Meningococcus, Corynebacterium, Clostridium, Hemophilus, Bordetella, Mycobacterium, Spirochaetes, Yersinia, Chlamydia.

4. Parasitology

- Protozoology Entamoeba and Plasmodium
- Helminthology- Ankylostoma. Ascariasis, Taenia, Wucheraria.

5. Virology

- General properties- of Virus and their diagnosis.
- Herpes, Adenovirus, Picorna, Hepatitis Virus
- Poxvirus, Rabies Virus, Poliovirus, HIV, Bacteriophage

6. **Mycology**
 - a) General Characters and methods used of study and diagnosis of fungal infections.
 - b) Superficial mycoses, systemic mycoses, Candidiasis, Aspergillosis, Mycetoma, Rhinosporidiosis.
7. **Applied Microbiology**
 - a) Normal bacterial flora of human body.
 - b) Diagnostic methods in common diseases
 - i) Meningitis, UTI, PID. Gastroenteritis, Respiratory Infection.
 - ii) Urogenital Infections, Pyogenic Infections, Nosocomial Infections, Infections of Ear, Eye and Oral Cavity
 - c) Bacteriology of Water.

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

1. Describe all the infectious micro-organisms of the human body and host-parasite relationship
2. Describe parasitic micro-organisms (viruses, fungi, bacteria, parasites) with the pathogenesis of the diseases they cause;
3. Illustrate sources and modes of transmission, including insect vectors, of pathogenic and opportunistic organisms;
4. Describe the pathways and mechanisms of immunity to infection
5. Correlate knowledge about different vaccines that are available for the prevention of communicable diseases;

Assessment Scheme:

Theory	– 70 Marks
Internal Assessment	– 30 Marks

MICROBIOLOGY PRACTICALS

1. Microscopes & Microscopy
2. Sterilization & Disinfection
3. Morphology of Bacteria
4. Culture media
5. Culture methods
6. Staining of Bacteria
 - a) Grams staining
 - b) Alberts staining
 - c) Z-N staining
7. Stools Examination
8. Identification of Bacteria
9. Demonstration of V.D.R.L. test
10. Demonstration of Widal test.

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

1. Illustrate and Effectively use sterilization and disinfection to control and prevent nosocomial and community acquired infections;

2. Analyse and Order laboratory investigations for bacteriological examination of food, water and air.
3. Analyse and Prescribe and interpret laboratory investigations for diagnosis of communicable diseases and identify infectious agents by clinical manifestations;
4. Demonstrate common bed-side tests to detect and identify pathogenic agents, such as blood film for malaria, filaria, gram stain and Acid Fast Bacilli (AFB) staining and stool sample for ova cyst, etc.

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

Text Books

1. Text Book of Microbiology – By R. Anantha Narayana & C.K. Jayaram Paniker
2. Parasitology – By Jayaram Panikar
3. Bacteriology – By Dey
4. Text Book of Microbiology – By Chakravarty

Reference Books

1. Parasitology – By Chattarjee
2. Practical Microbiology – By R. Cruick Shank
3. Clinical Microbiology – By Bailey & Scott
4. Medical Laboratory Manual – By Monica Cheesbrough

3. COMMUNITY MEDICINE

Course type- Core Course

Course code–BNY 205, BNY 206P

Credits- 4.5

Objective:

The objective of teaching Community Medicine to undergraduate students is to prepare them to function as community and first level physicians in accordance with the institutional objectives.

THEORY

1. Evolution of Medicine Ancient Medicine, Scientific Medicine, Modern Medicine, Medical Evolution.
2. Concepts in Community Health Concepts of Health, Health & Development, Indicators of Health, Concepts of Disease, Concepts of Prevention, Disease Control & Eradication, Public Health, Social Medicine, Community Medicine, Health Services, Planning & Management, Risk Approach, Evaluation of Health Services.
3. General Epidemiology Introduction, Measurement of Mortality & Morbidity, Epidemiologic Methods Descriptive Studies, Analytical Studies, Intervention studies, Association & Causation, Uses of Epidemiology, Infectious Diseases Epidemiology, Disease Transmission, Immunity, Immunizing Agents, Disease Preventions & Control, Disinfection, Investigation of an Epidemic.
4. Genetics.

5. Screening of Diseases Concepts, uses, criteria for screening, sensitivity & specificity
6. Epidemiology of communicable Diseases
 - a. Respiratory infections-smallpox, varicella, measles, rubella, Mumps, influenza, Diphtheria, Pertussis, Tuberculosis
 - b. Intestinal Infections - Polio, Viral hepatitis, Cholera, Acute Diarrhoeal Diseases, Typhoid, Food Poisoning, Amebiasis, Ascariasis, Ancylostomiasis, Taeniasis
 - c. Arthropod-borne infections Yellow fever, Japanese Encephalitis, Malaria, Filaria.
 - d. Surface Infections- Rabies, Trachoma, Tetanus, Leprosy, STD, AIDS.
7. Epidemiology of non-communicable diseases Cancer, Cardio-Vascular Diseases, Diabetes, Obesity, Blindness, Accidents, Hypertension, Stroke, Rheumatic Heart Disease.
8. Demography & Family Planning Demographic cycle, Population trends, Fertility related Statistics, Health aspects of Family planning, Contraceptive methods and Delivery System, National Family Welfare Programme.
9. Preventive Medicine in Obstetrics, Paediatrics & Geriatrics Antenatal, Intranatal, Postnatal Care, Low Birth Weight, Infant Feeding, Growth & Development, Growth Chart, Under fives clinic, National Health Policy, Indicators of MCH care, School Health Services, Behavioral Problems, Geriatrics.
10. Environment & Health and Occupational Health Purification of water & water Quality Standards, Air, Ventilation, Lighting, Noise, Radiation, Air Temperature & Humidity, Housing, Solid Wastes Disposal & Control, Excreta Disposal, Water Carriage System, Modern Sewage Treatment, Entomology Mosquito, Housefly, Lice, Itch mite, Cyclopes, Rat Flea, Rodents, Insecticides - Hazards, Diseases, Preplacement Examination, Measures for General Health, Protection of Workers, Prevention of Occupational Diseases, Legislation.
11. Basic Medical Statistics Censes, Vital Events, Legislation, SRS, Notification of Diseases, Measures of Dispersion & Centring, Sampling, Tests of Significance, Correlation & Regression.
12. Health Educations and Communication Objectives, Principles, Aids, Practice of Health Education, Planning and Evaluation.
13. Health Planning - Management - International Health Organizations. Planning Cycle, Management Methods & Techniques, National Health Policy, Health Planning in India, Five Year Plans, Health Systems in India- at Centre, State and District Levels, Panchayat Raj, Rural Development Schemes.
14. Health care of Community - Health Systems and National Health Programmes. Levels of Health care, Health for All, Primary Health Care, Health Care Delivery, Health Problems, Health Care Services and Systems, Voluntary Agencies, National Health Programmes.

COURSE OUTCOME

After completion of the course, the student shall be able to:

1. Describe the health care delivery system including rehabilitation of the disabled in the country;
2. Describe the National Health Programmes with particular emphasis on maternal and child health programmes, family welfare planning and population control;
3. Classify and List epidemiological methods and describe their applications to

- communicable and non-communicable diseases in the community or hospital situation;
4. Illustrate the demographic pattern of the country and appreciate the roles of the individual family, community and socio-cultural environment in health and disease;
5. Explain the health informationsystems;
6. Correlate the principles and components of primary health care and national policies to achieve the objective of „Health administration, Health education in relation tocommunity“.

Assessment Scheme:

Theory – **70 Marks**
Internal Assessment – **30 Marks**

COMMUNITY MEDICINE PRACTICALS

1. Insecticides - 10 + Models.
2. UniversalImmunization Programme - 10 + Models.
3. Communicable Diseases - 10 + Models.
4. Insect Borne Diseases - 10 + Models.
5. Microscope Slides - 10 + Models.
6. Environment and Sanitation - 10 + Models.
7. Statistical Charts
8. Field Visits
 - a) Rural Health Centres.
 - b) Sewage Disposal Plant.
 - c) Water Filtration Plant.
 - d) Nature Cure Hospitals.
 - e) Yoga Institutes etc.

COURSE OUTCOME-

1. Illustrate epidemiology as a scientific tool for making national decisions relevant to community and individual patientintervention;
2. Analyse, interpret and present simple community and hospital baseddata;
3. Deduce, Diagnose and manage common health issues and emergencies atthe individual family and community levels with existing healthcare resources, respecting socio-culturalbeliefs.
4. Demonstrate, Design, implement and evaluate health education program using simple audio-visualaids

Assessment Scheme

Practical Assessment - **90 Marks**
Theory viva - **60 Marks**
Practical viva - **30 Marks**
Practical internal assessment - **10 Marks**

TEXT BOOKS:

1. Text Book of preventive and Social Medicine-By J.E. Park & K.Park
2. Text Book of preventive and Social Medicine-By B.K. Mahajan & M.C. Gupta

REFERENCE BOOKS:-

1. Preventive Medicine by Dr. Ghosh.
2. Preventive Medicine by Dr. Yashpal Bedi. REFERENCE PAPERS:-
 - World Health Organization Programmes papers.
 - National Health Programmes papers.
 - Voluntary Health Programmes Papers.
 - Red Cross Programmes Papers.
 - UNICEF Programmes papers.

4. YOGA PHILOSOPHY

Course type- Core Course

Course code-BNY207, BNY 208P

Credits- 5

Objective:

The objective of teaching *Yoga* philosophy to undergraduate students is to understand the intricacies of *Yoga* as a philosophy, its relation to ancient texts, other religious thoughts like Buddhism, with reference to *nyaya*, *vasistha*, *samkhya*, *mimamsa*, *Vedanta* and *Patanjali Yogasutras*.

THEORY

1. Yoga, its definition, its basis, purpose, its relation to philosophy and its application.
2. Historical highlights of Yoga-Practices and literature from the ancient to modern times with special reference to nature of yoga upanishads, smritis & puranas.
3. The philosophical Nature of Man and his essence, destiny in concept of Yoga.
4. The theory of Body, Mind, Life and Nature of soul, and evidence for the existence of soul.
5. The existential situation of man as reflected in European and Indian thought.
6. Basic concepts of Indian Psychology-definition a brief history of psychology, contemporary psychology according to Freud, Mr. Woodsworth and various psychologists, yogic science in relation to Psychology.
7. Astanga Yoga (8-Limbs of Yoga-patanjali)
8. Streams of Yoga-Jnana Yoga, Karma Yoga, Raja Yoga and Bhakti yoga.
9. Asanas - their importance, methods, rules, regulations and limitations.
10. Spiritual values of pranyama & kriyas, their methods, importance, rules and regulations, difference between breathing exercises & Pranayama.

COURSE OUTCOME

After the completion of the course, the student shall be able to:

1. Illustrate the basic understanding of *Yoga* as a philosophy
2. Explain the various schools of philosophy which had an influence on *Yogic text* like buddhism, *samkhya*, *mimamsa* etc.
3. Correlate the concept of *brahman* according to *Vedanta*.
4. Describe spiritual values of pranayama and kriyas.

Assessment Scheme:

Theory – 70 Marks
Internal Assessment – 30 Marks

YOGA PRACTICAL

Loosening exercises (Shitikarana Vyayama)& Breathing exercises- allexcercises from “Asanas” pranayama Kriya.-Vivekananda Kendra Publication.

I) Yogasanas

- | | |
|--------------------------|--------------------------|
| 1. Siddhasana | 2. Padmasana. |
| 3. Bhadrasana. | 4. Samasana. |
| 5. Swastikasana. | 6. Vajrasana |
| 7. Simhasana | 8. Gomukhasana. |
| 9. Virasana | 10. Ardha Matsyendrasana |
| 11. Vakrasana | 12. P. aschimottasana |
| 13. Ustrasana | 14. Uttitapadasana |
| 15. Shalabhasana. | 16. Pavanmuktasana. |
| 17. ViparitaraniAsana. | 18. Sarvangasana |
| 19. Dhanurasana. | 20. Halasana |
| 21. Matsyasana | 22. Kurmasana |
| 23. Kukkutasana | 24. Mayurasana |
| 25. Sirsasana | 26. Trikonasana |
| 27. Ardha Katichakrasana | 28. ParshavaKonasana |
| 29. Konasana | 30. Katichakrasana |
| 31. Padhastasana | 32. Savasana |
| 33. Makarasana | 34. Baddhapadmasana |
| 35. Naukasana | 36. Chakrasana |
| 37. Garudasana | 38. Akarna Dhanurasana |
| 39. Janusirshasana | 40. Suptavajrasana |
| 41. Padangusthasana | 42. Karnapidasana |
| 43. Tolangulasana | 44. Garbhasana |
| 45. Yoganidhrasana | |

II) Pranayama

1. Anuloma Viloma
2. Nadi Suddhi
3. Ujjayi
4. Sheetali
5. Shitakari
6. Bhastrika
7. Bhramari
8. Suryabhedana
9. Chandrabhedana
10. Sadanta

iii) Kriyas

1. Neti - Jal and Sultra.

2. Dhouti - Vamana and danda
3. Trataka - yoti and Bindu
4. Kapalabhati

IV) Meditation (Dhyana)

1. Cyclic Meditation
2. Omkara Meditation

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

1. Demonstrate knowledge of *pranayamas*, *prana* and lifestyle, breathing and life span.
2. Demonstrate various types of *Yogasanas* in their correct method of performance;
3. Demonstrate different *pranayamas*;
4. Describe various philosophies of *Yoga* and apply them therapeutically, relating to a patient's life situation or personality.

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

Books Recommended:

1. The History of Yoga-Vivian Worthinton
2. The psychology of yoga-Taimini
3. The Science of Yoga-Taimni
4. Yoga & Indian Philosophy-Karel Werner
5. The Basis and application of Yoga Dr. Nagendra (Vivekananda Kendra Publication)
6. Jnana Yoga, Bhakti Yoga, Karma yoga, Rajaj Yoga By Swami Vivekananda (Vivekananda Kendra Publication)
7. Narada Bhakti Sutras.
8. Asanas
9. Pranyama (Kaivalyadhama Lonavala Publications)
10. Asana, Pranayama, Kriyas
11. Pranayama- Vivekananda Kendra Publication
12. Yoga philosophy in relation to other system of philosophy - S.N. Das Gupta
13. Yoga Deepika - B. K. S. Iyengar.
14. Psychology - Florance C. Kerip
15. Asana why and how - O.P. Tiwari (Kaivalyadham)
16. Yogank - Kalyan - Gita Press, Gorakhpur
17. Light on The Yoga Sutras of Patanjali - B.K.S. Iyenger
18. Light on Yoga - B.K.S. Iyenger
19. Light on Pranayama - B.K.S. Iyenger
20. Hatha Yoga Pradipika - Swami Muktibodhananda
21. Asana, Pranayama, Mudra, Bandha – Swami Satyananda Saraswati Bihar School of Yoga

5. MAGNETOTHERAPY AND CHROMO THERAPY

Course type- Core Course

Course code–BNY 209, BNY 210P

Credits- 6

1. Objective:

The objective of teaching Colour therapy and Magneto biology to undergraduate students is to provide them with comprehensive understanding of philosophy, science and modes of applications of colours and magnets in preventive, curative and rehabilitativetherapy.

THEORY

1. Introduction
 - a) Definition of Magetotherapy
 - b) Historical highlights
 - c) Use of magnets upheld byNaturopathy
2. Magnetism in theUniverse
 - a) Earth a huge naturalmagnet
 - b) Nature of EarthMagnetism.
 - c) Earth magnetic effects on the humanbeings.
3. Effects of Magnetism on livingorganisms.
4. Bio-magnets- Biological experiments withmagnets
5. Medical influence of magnetic field Rheumatoid arthritis, hemiplegias, arthralgia, Neuralgias, Stimulation of nervous system, endocrine glands etc.
Magnetotherapy, symptomatic relief, combined treatments i.e. Magnetotherapy, Hydrotherapy, Massage, Diet & Yoga and the result of these combined treatments.
6. Magnets and theircomposition
 - a) Natural magnets and artificialmagnets
 - b) Permanent magnets - classification of magnetic materials , Power of magnets-various qualities of magnets- low, medium and high power magnets and magnetic beltsetc.
 - c) Electro magnets - electro magnetic field on human behaviour, Electro magnets-for medical purpose -Electro magnetic treatment, bed and hand Magnetiser, foot magnetiser, vibroelectro massager, electro-magnetic chair etc. Non Pulsating clinical Electromagnet.
7. Technique of application of magnets - North and South pole, local & general treatment and the Technique of application of Magnets in treatment of various commondiseases.
8. Magnetised water and Magnetisedoils Magnetised water in Nature influence of magnetic field on the properties of water, method and preparation of magnetised water, dosage and therapeutic effect of magnetised Water. Method of preparation of magnetised oils and their application and therapeutic effects.

9. Advantages of Magneto Therapy, Magnetotherapy is a natural treatment - Use of Magnets as a preventive device.
10. Clinical Reports from Indian and Foreign Magneto Therapists.
11. Magneto therapy and Acupressure- Acupuncture Points- Certain clinical case reports. Utilisation of Acupuncture points in Magneto therapy
12. Terminology - Technical terms related to Magneto therapy.
13. Recent developments in Magnetotherapy.

Text Books

1. Magneto therapy - Dr. H.L.Bansal
2. Magnetic cure for common diseases - Dr. R.S. Bansal, Dr. H.L.Bansal
3. The text book on Magneto therapy - by Dr. Nanubhai Painter
4. Magnetotherapy and Acupuncture - Dr. A.K. Mehta

Reference Books—

1. Electromagnetic treatment - Dr. H.L.Bansal
2. Magnetic fields or healing by magnets - Dr. A.R. Davis and Dr. A.K. Bhattacharya of Naihati of West Bengal.

CHROMOTHERAPY

Theory

1. Introduction
 - a) Historical Highlights
 - b) Harmonic laws of the universe
 - c) Solar Family
2. Theory of light and force
3. Chromophilosophy-Reflection, Refraction, Absorption
4. The Source of light- the sun forming sources, the solar atmosphere- sun power- how the colour effects are produced - influence of sun light on skin, muscles, digestive organs, Bones.
5. Chromo-Chemistry- character of spectrum analysis, materials discovered by the spectroscopy, the spectrum - spectrum of grey and natural colour elements- spectra of elements of positive colours, chromatic repulsion and attraction.
6. Chromo-diagnosis and chromo-hygiene.
7. Chromo - therapeutics - the healing power of colour, healing power of red, yellow, orange, blue, Green and Violet, non-spectral colours, sun stroke action of sun light on microorganisms.

8. Practical instruments for colour healing –Blue, Green, Red, pink, Violet, Yellow, Orange glasses- the solar thermoleum- the electro thermoleum, chromodisc, the chromolens- chromo lighteradiator.
9. Directions to be followed during treatment with light.
10. Healing by means of substances charged with different coloured light- method of solarization of water, oils and food substances etc.
11. Chromo therapy prescriptions for different diseases.
12. Chromo - Mentalism.
13. Bordeaux medicine. Chromoth.

AIR THERAPY

1. Composition of Air -Night and Day composition.
2. Ozone in the atmosphere.
3. Air Pollutants, their acceptable values
4. Physiology of Respiratory system.
5. Air baths (Cold and Hot)
6. Theory of Panchapranas and Nadis.

SUN THERAPY (HelioTherapy)

1. History
2. Physiological and Chemical properties of Sunlight.
3. Effect of sunlight on vegetation and Micro-organism.
4. Rejuvenation during diseases.
5. General SunBath.
6. Dr. Rikli's method of SunBath.
7. Dr. Kuhne's method of Sun Bath.
8. Sun Bath through wetpack.
9. Sun bath of children and aged persons.
10. Sunbath with leaves-Atapasnana.
11. Oil sun bath (Abhyangasnana)
12. Sun Stroke.
13. Practice of Exercise in Sunlight.

COURSE OUTCOME

After the completion of the course, the student shall be able to:

1. Correlate basic understanding of principles along which colours and magnets can be used as therapeutic agents, along with history of therapeutic uses of colours and magnets;
2. Explain bio-magnetism, electro-magnetism, properties of magnets, mechanisms of action of magnets on the human body, magnetic overload, charging, modes of application, etc. and apply this knowledge to therapeutically use magnets;

3. Illustrate classification of colours, physics of light, electromagnetic spectrum, pathway of vision, human aura, chakras, heliotherapy, colour breathing, chromo charging, and latest research, applying the same to diseasemanagement;
4. Deduce various diseases and disorders of the body and mind using the principles of colourdiagnosis;
5. Analyse the therapeutic values of colours and magnets in treatment of various diseases
6. Analyse latest research finding in improving his/her professionalpractice

Assessment Scheme:

Theory – 70 Marks

Internal Assessment – 30 Marks

CHROMO MAGNETO THERAPY PRACTICALS

Students should, have demonstration classes in various chromotherapeutic devices and their clinical application, various types of Magnets, equipment and their clinical application.

1. Case studies withrecord
2. Cases with bio-chemicalreports
3. Demonstration of colour glasses & bottles.
4. Demonstration of instruments andequipments.

COURSE OUTCOME

After the completion of the course, the student shall be able to:

1. Correlate various diseases and disorders of the body and mind using the principles of colourdiagnosis;
2. Illustrate and implement a plan of treatment using colours and magnets as therapeutictools
3. Explain the therapeutic values of colours and magnets in treatment of various diseases
4. Analyse latest research finding in improving his/her professionalpractice

Assessment Scheme

Practical Assessment - 90 Marks

Theory viva - 60 Marks

Practical viva - 30 Marks

Practical internal assessment - 10 Marks

TextBooks

1. The principles of lightand colour - By Dr. E.D. Babbit
2. Human Culture and Cure in five parts - By Dr. E.D. Babbit
3. Colourtherapy. - By R.S. Amber
4. HealingthroughColour - By Thea-Gimbel

REFERENCEBOOKS

- | | |
|-----------------------------------|---------------------------------------|
| 1. The power of therapies | - By S.G.J. Oseley |
| 2. Colour Meditations | - By S.G.J. Oseley |
| 3. Colour and healing | - By Gladys Mayer |
| 4. Colour healing (Chromotherapy) | - By Health Research Foundation (USA) |
| 5. Practical colour Magic | - By Raymond Buckland |

ReferenceBooks:

- | | |
|---|---|
| 1. All You Wanted to Know About Sun Therapy | - VijayaKumar |
| 2. Colour Therapy-Miracle of Sunrays | - Rashmi Sharma and Maharaj KrishanSharma |
| 3. Science of Natural Life | - Rakesh Jindal |

| 5. Dhanwantari-prakrtik Chikitsank | - Ganga Prasad Gaud "Nahar" |

THIRD YEAR 1.

MANIPULATIVE THERAPY

Course type- Core Course Course code-BNY 301, BNY 302P

Credits- 4

1. Objective:

The objective of teaching Manipulative Therapies to undergraduate students is to provide them with comprehensive understanding of science and modes of applications of different manipulative modalities like Massage, Chiropractic, Osteopathy, Aroma therapy in preventive, curative and rehabilitative therapy.

THEORY

1. Introduction and History of Massage.
2. Rules, Regulations and Characteristics of Masseur
3. Structures especially concerned in massage and parts of the body to be specially studied for the purpose is as follows:
 - a) Skin
 - b) Muscular System
 - c) Heart and Circulation
 - d) Nervous System
 - e) Skeletal System Including joints
4. Effects of the pressure of hand and lubricants on the following systems :-
 - a) Skin
 - b) Muscular System
Nutrition and Development Excitation of "M" & contraction of "M", Increase of muscularelectro-excitability, removal of the fatigue from muscle. On the ligaments and skeletal system
 - c) On the Circulatory system
 - f) On Respiration - Increase of respiratory activity and increase of

- tissuerepiration.
 - g) On GIT-Improvement in appetite, improvement in secretion of digestive fluids, absorption and improvement in peristalsis.
 - h) Excretory System
 - i) Powder Massage - merits and demerits.
5. Getting crisis through massage (Side effects and benefits)
6. Basic therapeutic massage techniques, indications and contraindications of massage while applying to the patients.
7. Massage and its effects:-
 - a) Nutrition
 - b) Haematogenesis
 - c) Phagocytosis
 - d) Increase in the number of blood corpuscles.
 - e) Absorption of increased inflammatory exudate, change in the weight of the person, obese or emaciated.
8.
 - i) Different Massage manipulations, classification and their detailed explanation, uses and contra-indications.
 - ii) Manipulative treatments in stress management
 - iii) Shiatsu in manipulative therapy (Acupressure)
 - iv) Manipulations and life extension.
 - v) Dry brush Massage
9. Movements of Joints:-
 - i) Flexion
 - ii) Extension
 - iii) Abduction
 - iv) Adduction
 - v) Supination & Pronation
 - vi) Circumduction
 - vii) Deviations - Medial and Lateral
 - viii) Opposition
10. Massaging in local areas under special circumstances-
 - a) Massage to Abdomen
 - i) Massage to liver
 - ii) Massage to Stomach
 - b) Massage to heart
 - c) Massage to head
 - d) Massage to spine
 - e) Special types of Massage in different diseases
11. Massage to women
12. Massage to infants and children
13. Massage for prevention of diseases and maintenance of natural beauty

14. Ayurvedic Massage-Terminology, Methods and Manipulations
15. Chiropractic:-
Origin & aims of Chiropractic.
X-Ray Technique and Chiropractic. Importance of spine in Chiropractic. Physiological effects of Chiropractic. Spinal Manipulative Therapy Chiropractic Examination. Chiropractic treatments in various Diseases
16. Osteopathy :-
Definition & the Basic principles of osteopathy, Relation of osteopathy to Musculo-skeletal system.
17. Aromatherapy:-
 - A. Definitions, Origin and History of Aromatherapy.
 - B. Essential Oils and Its types, extraction of essential oils, distillation, cold pressing or expression, sloven extraction, storage, recognition, selection and mechanism of essential oils.
 - C. Carrier oils - Almond, Apricot, Avocado, carrot, corn, primrose, grapeseed hazelnut, Jojoba, Olive, Peanut, safflower, sesame, Soyabean & sunflower oil.
 - D. Different methods of using essential oils-inhalation, diffusers, vaporizers, massage, baths, foot bath, pot pouri, compresses, oral intake, beauty treatment, room sprays, insect repellent etc.
 - E. Description of different essential oils & their benefits.
 - F. The best essential oils - The five fragrance categories - green, floral, citrus, Woody & Spicy and mixing of Aroma Oils & Equipment required for Mixing Oils.
 - G. Aroma Oils for common problems and their therapeutic properties.
 - H. Precautions, ill effects and careful handling of essential oils
 - I. Contraindications- Oils to be avoided in particular problems

COURSE OUTCOME-

At the end of course, a student should be able to –

1. Understand the principles and history of manipulative therapy.
2. Description and therapeutic uses of different types of oils.
3. Analyse the application of manipulative therapy in clinical practice.
4. Analyse the research based new development in manipulative therapy.

Assessment Scheme:

Theory – 70 Marks

Internal Assessment – 30 Marks

MANIPULATIVE PRACTICALS

1. 35 demonstration classes
2. 10 demonstrations in Panchakarma
3. Each student should do 35 massages

COURSE OUTCOME

After the completion of the course, the student shall be able to:

1. Demonstrate different types of massage and manipulative therapies, such as Osteopathy. Chiropractic, Aromatherapy, Swedishmassage, Kellogg's massage, Shiatsu, Geriatric Massage, Pediatric massage, Antenatal massage, Ayurvedic massage, etc.
2. Analyse therapies such as Reflexology and Zone therapy in their professional practice for musculoskeletal disorders, etc.
3. Explain the disease and relevant treatment to thepatient.
4. Correlate and study the disease and the manipulativepractices.

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

Text Books:-

1. Massage Books - By George Downing
2. Massage - By Constant Young
3. Massage Therapy - By Dr. J.H. Kellog
4. The Complete Book of Massage - By Clare Maxwell Hudson
5. Step by Step Massage - By Carole Me. Gilvery and Gini Reed
6. The Book of Massage - By Luinda Lidell w ith Sarathomas,Carola Berb Ford Cooke and AnthonyPorta
7. The Complete step-by-step guide to eastern and western
8. Baby Massage - The Magic of Loving Touch - By Auckett, Anelia D
9. Natural Healing from Head to Toe - By Aihara, comellia - Aihara, Herman
10. Massage Works - By D. Baloti Lawrence and Lewis Harrison
11. Manual of osteopathy Practice - By Alan Stoddard
12. Alternative Chiroprathy Practice - By Susan Moore
13. Massage (Ayurvedic) - By Achanta Laxmipathy

Reference Books:-

1. The Panchakarama Treatment of Ayurveda - By T.L. Devraj
2. Chiro therapy: A-Text of Joint Movements - By Hesse P.De.
3. MassageTherapy: the Holistic Way to Physical and Mental Health - By Juckson Richard
4. Book of Massage and Aromatherapy - By Facroix Nity and (Achieving complete relaxation & seager, Shoron well being with massage and essential oils)
5. Brain Massage, Revitalize mind body - By Howell, Kelly. Massage to Common Ailments - By Penny Rich
6. All you wanted to know about Aromatherapy - By Lalita Sharma
7. Aromatherapy - By Julie Sadler

8. Health and Beauty through Aromatherapy - By Blossom Kochhar
9. Ayurveda & Aromatherapy - By Dr. Light Miller & Dr. Bryan Miller

2. ACUPUNCTURE

Course type- Core Course

Course code-BNY 303, BNY 304P

Credits- 4

1. Objective:

The objective of teaching acupuncture to undergraduate students is to provide them with a comprehensive understanding of the science and art of Acupuncture, Acupressure and related therapies.

THEORY

1. Definition, concepts of Acupuncture.
2. Traditional and modern theories of Acupuncture.
3. Materials and Methods of Acupuncture.
4. Principles of Acupuncture.
5. Rules for selection of Acupuncture points.
6. Contraindications and complications of Acupuncture.
7. The concept of Meridians:-
 - a) Lung Meridian (Lu)
 - b) Large intestine Meridian (LI)
 - c) Spleen Meridian (SP)
 - d) Stomach Meridian (ST)
 - e) Heart Meridian (H)
 - f) Small intestine Meridian (SI)
 - g) Urinary bladder Meridian (UB)
 - h) Kidney Meridian (K)
 - i) Triple warmer Meridian (TW)
 - j) Gall bladder Meridian (GB)
 - k) Liver Meridian (Liv)
 - l) Governing vessel Meridian (GV)
 - m) Conceptional vessel Meridian (C.V)
 - n) Eight extra Meridians
8. The extra-ordinary points.
9. Diagnostic methods (both- Acupuncture and Modern)
10. Auriculo Therapy 11 Moxibustion
12. Stimulation in Acupuncture.
13. Acupuncture Therapeutics
14. Acupuncture Anaesthesia
15. Reflexology & Zone Therapy:-

What is Reflexology, history and development. How does reflexology work Body & its reflex zones.

Applications, indications and contra-indications Preventive effects of reflexology
16. Acupressure :- What is Acupressure Its origin & development Physiological effects of Acupressure Therapeutic uses of Acupressure
17. Acupuncture/pressure in Acute disorders and emergency

18. PranicHealing.
19. Reiki

COURSE OUTCOME

1. Illustrate the definitions ofAcupuncture.
2. Description of the principles and historical highlights ofAcupuncture;
3. Classify and Correlate the concepts and theories mechanism behind Acupunctur.e
4. Demonstrate basic understanding of procedures of different styles of Acupuncture and related therapeuticmodalities.
5. Deduce basic and advanced tools used inAcupuncture;
6. Analyse the application of Acupuncture in clinicalpractice.

Assessment Scheme:

Theory – **70 Marks**

Internal Assessment – **30 Marks**

ACUPUNCTURE PRACTICALS

1. Demonstration of Needling techniques and Electro-stimulation, Moxibustion.
2. Each Student should give treatments to atleast 20 patients during the practicals.

COURSE OUTCOME

1. Demonstrate basic understanding of procedures of different styles of Acupuncture and related therapeutic modalities, such as Traditional Acupuncture, Scalp Acupuncture, Auriculotherapy, Acupuncture Anaesthesia, Reflexology, Zone Therapy, Acupressure, etc;
2. Illustrate case discussion and the techniques to beused.
3. Analyse evidence based acupuncture and its application.

Assessment Scheme

Practical Assessment - **90 Marks**

Theory viva - **60 Marks**

Practicalviva - **30 Marks**

Practical internal assessment - **10 Marks**

REFERENCE BOOKS-

1. Clinical Practice of Acupuncture - By A.L.Agrawal
2. Clinical Acupuncture - By Dr. AntonJayasurya
3. Principles and practice of Acupuncture - By Dr. J.K. Patel
4. Health in your hands - By DevendraVora
5. Shiatsu - By Ohashi

3. YOGA APPLICATION

Course type- Core Course Course code–BNY 305, BNY 306P

Credits-11

1. Objective:

The objective of teaching *Yoga* and its applications to undergraduate students is to provide

them with comprehensive understanding of *Yoga* with reference to traditional texts like *Patanjali Yogasutras*, *Hatha Yoga Pradipika*, *Shiva samhita*, *Gheranda samhita* and *Swara Yoga*; various streams of *Yoga*, advanced meditative techniques like *Yoganidra*, *Omkar*, *Cyclic*, *Vipassana* and learn about benefits of *Yogaas* compared to exercise.

THEORY

1. Patanjali yoga sutras - 1st two chapters. (ie., Samadhi Pada & Sadhana Pada, brief summary of Vibhutipada & Kaivalyapada)
2. Hatha Yoga Pradipika-full text with necessary reference to Gheranda Samhita & Siva Samhita.
3. Introduction to other streams of Yoga-Kundlini and Tantra Yoga.
4. Yoga Nidra-Methods, application, effects and benefits.
5. Meditation-Types of Meditation-Omkar, Cyclic, Vipassana etc. Methods of application. benefits, precaution, its influence on health and disease.
6. Different relaxation techniques.
 - a) Instant relaxation,
 - b) Quick relaxation,
 - c) Deep relaxation techniques-their methods, effects & benefits.
7. Yoga-in relation to personality and education.
8. Yoga-in relation to sports and games, social and political life.
9. Eye exercises- Benefits, methods, precautions.
10. Physiological aspects of Asanas.
11. Physiological, Neuro-Physiological aspects of pranayama.
12. Shat Kriyas- Comparative study of Shat Kriyas with other system of Medicine.
13. Physiological aspects of exercises
14. Physical exercises for health & fitness
 - (a) Introduction
 - (b) Who should stretch
 - (c) When to stretch
 - (d) Why to stretch.
 - (e) How to stretch
 - (f) Relaxing stretches for
 - i. Back, legs, feet and ankles.
 - ii. Hips, hamstring, lowback.
 - (g) Stretching exercises for elderly.
 - (h) Stretching exercises for
 - Abdominal muscles, Arms, Chest, Ankles, Legs, knee, thigh, fore arm etc.
 - (i) Techniques of walking, running, Cycling etc.
 - (j) Caring back.
15. Swara -Yoga

COURSE OUTCOME

After the completion of the course, the student shall be able to:

1. Illustrate the knowledge of traditional texts like *Patanjali Yoga Sutras*, *Hatha Yoga*, *Shiva Samhita* and *Gheranda Samhita*;
2. Explain the principles behind various meditative practices like *Yoganidra*, *Ommeditation*, *cyclic meditation*, *Vipassana* and so on;

3. Explain about *Yoga* in relation to its application in education, sports;
4. Demonstrate basic understanding of procedures of stretching and exercises;
5. Describe basic physiological changes of *asanas* and *shat kriyas* and their adverse effects
6. Describe the concept of *Yoga* as explained in the traditional texts;
7. Deliver a meditative session using any of the meditative styles;

Assessment Scheme:

Theory – 70 Marks

Internal Assessment – 30 Marks

YOGA PRACTICALS

- I. Asanas
 1. Including all asanas of I year adding some advanced postures from Yoga Deepika.
 2. All loosening (Shitilikarana Vyayama) and breathing exercises.
- II. Pranayama (as 1st B.N.Y.S.)
- III. Kriyas- (including Portion of 1st B.N.Y.S.)
 - 1) Dhouti-Vastra
 - 2) Gajakara ni - (Vari sara Dhouti)
 - 3) Nauli- (all three types).
 - 4) Shankha Prakshalana- 1. Laghu. 2.Maha
 - 5) Basti
- IV. Meditation-
 - 1) Omkara
 - 2) Cyclic
 - 3) Vipassana
- V. Techniques Like:-
 - 1) Self Management of Excessive Tension (SMET).
 - 2) Pranic Energisation Technique (PET).
 - 3) Mind Sound Resonance Technique (MSRT).
 - 4) Yoga Nidra (Short and long session).

COURSE OUTCOME

After the completion of the course, the student shall be able to:

1. Explain the knowledge of traditional texts like *Patanjali Yoga Sutras*, *Hatha Yoga*, *Shiva Samhita* and *Gheranda Samhita*;
2. Illustrate the principles behind various meditative practices like *Yoganidra*, *Ommeditation*, *cyclic meditation*, *Vipassana* and so on;
3. Demonstrate basic understanding of procedures of stretching and exercises;
4. Deliver a meditative session using any of the meditative styles;

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

Books Recommended-

1. The Science of Yoga - By Taimini (commentary on patanjali Yoga Sutras).
2. Hatha Pradipika - By (Kaivalyadhama Publication-Lonavla).
3. Yoga Nidra - By (Bihar School of yoga, Munger publications).
4. Kundalini Yoga.
5. Tantra Yoga.
6. Asana.
7. Pranayams - By Vivekananda Kendra Publications.
8. Psychology - By Horensce C.Kenipp.
9. Religiousness in Yoga theory & Practice - By TKV Desikachar.
10. Research papers – By Kaivalyadhama.
(Publication in Yoga Mimamsa- all papers relating to physiological effects of Yoga.)
11. Yoga in Education - By Dr. Nagendra (Vivekananda Kendra Publication)
12. Vipassana-By S.Goenka.
13. Anatomy & Physiology of Yoga -By Dr. M.M. Gore.
14. An over view on research papers. - By SVYASA, Bangalore
15. Patanjali yoga sutra - By Dr P.V. Karmavelkar (Kaivalyadham)
16. Patanjali yog pradeep - By Swami Omanand Teerth (Gita - press, Gorakhpur)
17. Hatha Yoga Pradipika - By Swami Muktibodhananda (Bihar School of Yoga)
18. Light on Yoga – By B.K.S. Iyenger
19. Light on Pranayama – By B.K.S. Iyenger
20. Light on The Yoga Sutras of Patanjali – By B.K.S. Iyenger

4. FASTING THERAPY

Course type- Core Course

Course code– BNY 307, BNY308P

Credits-4

1. Objective:

The objective of teaching Fasting Therapy to undergraduate students is to provide them with comprehensive knowledge of Fasting therapy and utilisation of the same for therapeutic purposes.

THEORY

- II. Introduction :-
 1. Theory of Fasting
 - a) Fasting in Animals
 - c) Your Tongue Never Lies
 - b) Miracles of Fasting
 2. History of Fasting

- a) Fasting in Ancient India
- b) History of Fasting in India
- c) History of Fasting in Foreign Countries
- d) Historical Highlights of Fasting

3. Science of Fasting

III. The Philosophy of Fasting

1. The Philosophy of Sane Fasting
2. Philosophy of Therapeutic Fasting
 - A) Life & its existence in connection with health and diseases
 - B) Nature of disease
 - C) The No-Breakfast Plan
 - D) Objections commonly raised in Fasting Therapy
 - E) Pros and cons of Fasting
 - F) Difference between Fasting and Starvation
 - G) Difference between Hunger and Appetite

IV. Physiology of Fasting:-

- 1) General Physiology.
- 2) Source and Metabolism of Carbohydrates, Fats and Proteins during Fasting & Starvation.
- 3) Chemical and Organic changes during Fasting.
- 4) Repair of Organs and Tissues during Fasting.
- 5) Changes in the Fundamental Functions While Fasting.
- 6) The Mind & Special Senses During a Fast.
- 7) Secretions and Excretions.
- 8) Bowel Action during a Fast.
- 9) The Influence of Fasting on Growth and Regeneration.
- 10) Gain and Loss of strength While Fasting.
- 11) Gain and Loss of weight During Fasting.
- 12) Autolysis
- 13) Fasting and Sex.
- 14) Rejuvenescence through Fasting.

V. Facts Explained About Fasting:-

- 1) Fasting Does Not Induce Deficiency “Disease”.
- 2) Death in the Fast.
- 3) Objections to the Fast.
- 4) The Quantity of Food Necessary to Sustain Life.

VI. Practice of Fasting:-

- 1) Does Fasting Cure Disease?
- 2) The Rationale of Fasting.
- 3) The Length of the Fast.
- 4) Contraindications of Fasting.
- 5) Fasting in Special Periods and Conditions of Life.
- 6) Symptomatology of the Fast.

- 7) Progress & Hygiene of the Fast.
- 8) Breaking the Fast.
- 9) Gaining Weight after the Fast.
- 10) Living After The Fast

VII. Rules and regulations of Sane Fasting and Therapeutic Fasting.

VIII. Definition and Classification offasting

- 1) Definition of fasting in differentaspects.
- 2) General classification of fasting (Religious, Political andTherapeutic.)
- 3) Methods and types of therapeutic fasting (Dry, whey, Juice, Salad, Monodiet (Kalpa), Fruits Intermittent, Preventive, Weekly etc.

IX. Hygienic Auxiliaries of Fasting-

- 1) Air and Breathing
- 2) Enema
- 3) Bathing
- 4) Clothing
- 5) WaterDrinking
- 6) Exercise
- 7) Mental Influence

X. Study of Patients During and After Fasting-

1. Crises during fasting and their management.
2. Physiological effects offasting.
3. Biochemical aspects.
4. Study of the tongue, the breath, the temperature and pulse etc.
5. The loss and the gain of weight.
6. How and when to break the fast.
7. Diet after the fast.

XI. Indications and Contraindications offasting.

XII. Therapeutic aspects of Fasting

1. Fasting in acute diseases.
2. Fasting in chronic diseases.
3. Role of fasting in various diseases.
4. Obesity andfasting.
 - a. Definition and assessment of obesity.
 - b. Epidemiology.
 - c. Etiology.
 - d. Clinical Features
 - e. Treatment.
5. Fasting for preservation of health and prevention of diseases.
6. Fasting in Drug Addiction.
7. Fasting Versus Eliminating Diets.

XIII. Results of Fasting.

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

1. Illustrate definitions and historical highlights of fasting therapy through the centuries, including fasting employed in different religions, the concept of dietetic principles in Naturopathy.
2. Classify fasting according to duration, purpose, type, etc.
3. Explain the metabolism of fasting, Calorie Restriction: Concept, Method, Prevailing basic- Clinical-applied evidence.
4. Describe importance of various components of diet, such as dietary fiber, vitamins, minerals, etc.
5. Analyse fasting therapy in managing various diseases.

FASTING PRACTICALS

Study of 50 fasting cases Case Study of 25 with record

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

1. Illustrate definitions and historical highlights of fasting therapy through the centuries, including fasting employed in different religions, the concept of dietetic principles in Naturopathy.
2. Classify fasting according to duration, purpose, type, etc.
3. Explain the metabolism of fasting, Calorie Restriction: Concept, Method, Prevailing basic- Clinical-applied evidence.
4. Demonstrate usage of therapeutic diets and fasting therapy in promotive, preventive, curative and rehabilitative therapy.

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

5. NATUROPATHY DIAGNOSIS

Course type- Core Course

Course code–BNY 309, BNY310P

Credits-4

1. OBJECTIVE:

The objective of teaching Diagnostic Methods in Naturopathy to undergraduate students is to provide them with comprehensive knowledge of diagnostic methods employed by traditional Naturopaths that can be used efficiently to diagnose various diseases without the use of sophisticated technology.

THEORY FACIAL DIAGNOSIS

1. Introduction to the science of facial expression.
 - a) Historical highlights.
 - b) Definition and scope of the science of facial expression.
2. Characters of the Healthy Body.
 - a) Normal functions.
 - b) Normal Figure.
3. Foreign matter theory:-
 - a) Definition of foreign matter.
 - b) The process of accumulation of foreign matter in the body.
 - c) Encumbrance.
 - d) Changes caused in the body due to the accumulation of foreign matter.
 - e) General pathology of foreignmatter.
4. The nature: origin and cure of diseases of children and theirunity.

5. Bad habits supports the accumulation of foreign matter in the body-tobacco, alcoholic drinks, coffee, tea, opium etc. Drug addictions -Pethedine, Heroin, Injection etc., Suppression of diseases viz elimination of morbid and diseased germs from the system.
6. Types of encumbrance - Front encumbrance, - back encumbrance front and right side Encumbrance, left side encumbrance and mixed or whole encumbrance, their description, general characters and possible diseases in the concerned encumbrance and their treatment.
7. Diseases of the internal organs and their treatment.
8. Process of elimination of foreign matter.
 - a) Importance of Nature Cure treatments.
 - b) The digestive process-natural dietetics.
 - c) Artificial outlets of elimination
9. Methods to be followed to increase the vitality of the body.
10. The importance of Nabhi Pareeksha, the methods of Nabhi Pareeksha & the techniques of correction.

IRISDI AGNOSIS:-

1. Introduction of iridology:
 - a) Definition of Iridology-;
 - b) Historical highlights.
 - c) Comparison of other systems - Allopathy, Homeopathy, Ayurveda, Unani etc. Diagnostic methods.
 - d) Anatomy of the Iris.
 - e) Theory in application.
 - f) The theory of heal ing crisis.
 - g) A unit form division and classification of diseases.
 - h) Philosophical phase.
 - i) The oretical phase
2. I. Instructions in Methods of Application:-
 - a) Technique in Irisreading.
 - b) The normal and abnormal Iris, colour of the Iris.
 - c) The Vibratory theory.II. Study of density of the Iris.
III. Key to Iridiology.
 - a) Iris charts brought up to date.
 - b) Zone areas.
 - c) Sectoral Division.
3. Comparison of fermentation viz inflammation.

4. Interpretations of Irismanifestations.
 - I.
 - a) Types of inflammation
 - b) Inherent (Lesions andweakness)
 - c) Acidity andCatarrh
 - d. Toxicsettlements
 - e. Nerve Rings
 - f. The Lymphaticrosary
 - g. Injuries and operations
 - h. Itch or Psora spots in the iris - the surfrim
 - i. The radii-solaris
 - j. Tumours
 - k. The sodiumring
 - l. Anaemia in the extremities and in the brain.
 - M. Drugs and chemicals appearence on the Iris and their poisonous effects in the body Arsenic, Bismuth, Bromides, Coaltar products, Ergot, Glycerin, Iodine, Iron, Lead, Mercury, Opium , Phosphorous, Quinine, Salicylic acid, Sodium, Strychnine, Sulphur, Turpentine, Vaccines etc.
 - II. The iris reveals the cause of disease.
5. Case histories according to Iridology.
 6. Advance research inIridology.
 - a) Reflex areas and remotesymptoms.
 - b) Stomach and intestinal disorders, the principle causes, the principle disorders & remedial Measures.

COURSE OUTCOME:

After the completion of the course, the student shall be able to:

1. Illustrate historical significant developments in diagnostic procedures used in Naturopathy and the characteristics of a Healthy Body with respect to Naturopathic Principles
2. Describe philosophical theories of causation of disease according to Naturopathy
3. Analyse knowledge of theory of encumbrances, their types and interpretation, along with naturopathic ways to therapeutically correctthem.
4. Describe in detail Iris Diagnosis, with respect to history, techniques, iris signs, interpretations and tools used, and use the same to diagnose diseases;
5. Explain the techniques and interpretations of stool and urine diagnosis, correlating modern medical knowledge and Ayurvedic *sthoola* and *muthra pariksha*;
6. Analyse and apply different diagnostic procedures in Naturopathy to effectively and accurately diagnose various diseases, such as Iris Diagnosis, Facial Diagnosis, Stool and Urine Diagnosis, etc.

Assessment Scheme:

Theory	– 70 Marks
Internal Assessment	– 30 Marks

NATUROPATHY PRACTICALS

1. Clinical classes
2. Demonstrations in the Nature Cure Hospital.
3. Case Studies 25 with Record.
4. Demonstration of Equipments.

COURSE OUTCOME:

After the completion of the course, the student shall be able to:

- a) Illustrate historical significant developments in diagnostic procedures used in Naturopathy and the characteristics of a Healthy Body with respect to Naturopathic Principles
- b) Explain philosophical theories of causation of disease according to Naturopathy
- c) Deduce knowledge of theory of encumbrances, their types and interpretation, along with naturopathic ways to therapeutically correct them.
- d) Demonstrate the techniques and interpretations of stool and urine diagnosis, correlating modern medical knowledge and Ayurvedic *sthoala* and *muthra pariksha*;

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

Recommended Text Books:-

1. Science of Facial Expression - By Louis Kuhne
2. The New Science of Healing - By Louis Kuhne
3. The Science and Practice of Iridology - By Bernard Jensen
4. Iridagnosis and other Diagnostic Methods - By Henry Lindlahr

REFERENCE BOOKS:-

1. Iridology : A Guide to Iris Analysis and Preventive Health Care – By Adam J. Jackson
2. Iridology: How to Discover Your Own Pattern of Health and well being Through the Eye - By Dorothy Hall
3. Iridology: A Complete Guide to Diagnosing through the Iris and all related forms of treatment - By Davis and Farida.
4. Iridology : Alternative Health Series - By Adam J. Jackson

5. Vision of Health: Understanding Iridology - By Jensen, Bernard and Booden, Donald.
6. Eyes Talk: Through Iridology Better Health - By Vriend Joha.

6. MORDERN DIAGNOSIS

Course type- Core Course

Course code-BNY 311, BNY312P

Credits-5

1. Objective:

The objective of teaching Diagnostic Methods in Conventional Medicine to undergraduate students is to provide them with comprehensive knowledge of diagnostic methods employed by conventional doctors that can be used efficiently to diagnose various diseases, for diagnosis as well as prognosis.

THEORY

Section A-Clinical Diagnosis

- I. Examination of Patients :-
 1. Approach to apatient
 2. History taking and case sheetwriting
 3. Symptomatology
 4. Examination of Vital Data
 5. Importance of height, weight, abdominalgirth
 6. General physical examination
 7. Examination of breasts, back, spine and genitals
 8. Systemic examination of the patient
 - a) Abdomen (Digestive system)
 - b) Cardiovascular System
 - c) Respiratory System
 - d) Renalsystem
 - e) Central Nervous system
 - f) Locomotor system
 - g) Examination of ear, nose and throat
 - h) Gynaecological examination
 9. Provisional Diagnosis
- II. Routine and special Investigations:-
 1. LaboratoryInvestigation
 - a) Urineanalysis
 - b) Stool examination
 - c) Blood examination
 - i) Peripheral smear, Total WBC Count, Differential WBC Count
 - ii) Erythrocyte sedimentation rate (E.S.R), Hb Estimation
 - iii) Blood Sugar, Blood Urea, Serum uric acid, Serum cholesterol, Serum lipid profile, Serumcreatinine.

2. Radiological Investigation:-
 - a) Plain chestX-Ray
 - b) K.U.B.
 - c) Lumbar and cervicals spine
 - d) Skull and paranasalsinuses
 - e) Joints
3. Contrast Radiography :-
 - a) Cholecystography
 - b) Pyelography
 - d) Angiography
 - e) Bronchogram
4. Electro cardiography
5. Echo-Cardiography
6. Coronaryangiography
7. Electro-Encephalography
8. Bio-chemical investigations-
 - a) Liver functiontests
 - b) Creatinine clearancetest
 - c) Vanillo-mandellic acid (VMA) excretion test inurine
 - d) SGOT andSGPT
 - e) LDH
 - f) CPK
9. Diagnostic Paracentesis
10. Diagnostic Thoracocentesis
11. Lumbar Puncture and CSF analysis
12. Radio-active Iodine up-take studies
13. Thyroid T3, T4 estimation
14. Diagnostic skintests
15. Endoscopicprocedures
16. Ultra-sonography
17. Computerised tomographic scan (CTScan)
18. Magnetic Resonance technique (MRI)
19. Positron Emission Tomography (PET)
20. Doppler Study

III. Final Diagnosis Section B- FIRST AID

1. General principles of First Aid
2. Wounds Control of hemorrhage, Epistaxis
3. Shock- Classification and treatment
4. Dog bite, Snake bite, Scorpionsting
5. Burns andScalds
6. Heat exhaustion, heat stroke and fainting, frostbite
7. Fractures, dislocations, sprains andstrains
8. Poisoning
9. Epileptic fits, convulsions inchildren
10. Aspiration of foreignbody
11. Artificial respiration

12. Bandages of different types
13. Unconsciousness and general principles of treatment Section C-Recognition, Evaluation of Clinical Emergencies.

- I. Cardio Vascular System:-
 1. Acute myocardial infarction
 2. Cardiogenic Shock
 3. Cardiac arrhythmias
 4. Cardiac arrest
- II. Respiratory System:-
 1. Hemoptysis
 2. Status asthmaticus
 3. Spontaneous pneumothorax
 4. Acute respiratory failure
 - 5.
- III. Gastro Intestinal System:-
 1. Acute Vomiting
 2. Perforation of Peptic Ulcer
 3. Hematemesis
 4. Hepatic Precoma and coma.
- IV. Central Nervous System:-
 1. Unconscious patient
 2. Cerebrovascular catastrophes
 3. Convulsions
 4. Status epilepticus
- V. Renal System:-
 1. Acute renal failure
 2. Renal colic
 3. Hematuria
- VI. Endocrine and Metabolism:-
 1. Thyroid crisis
 2. Adrenal Crisis
 3. Diabetic Keto acidosis and coma
 4. Hypoglycemia
- VII. Miscellaneous Emergencies-
 1. Syncope
 2. Acute peripheral circulatory failure
 3. Acute reaction
 4. Hypothermia

RECOMMENDED TEXT BOOKS:-

1. Hutchinson's Clinical Methods - By Chamberlin

- | | |
|---|--------------------------------------|
| 2. Clinical Methods | - By P.S.Shanker |
| 3. Manual of Clinical Methods | - By JaiVakil |
| 4. Clinical Diagnosis | - By P.J.Mehta |
| 5. Modern Diagnosis | - By Red CrossSociety |
| 6. Oxford's handbook of Clinical Medicine | - By St. John Ambulance Association. |
| 7. FirstAid | - By L.C. Gupta and others |

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

- Understand the procedures and nuances in approaching a patient and taking a detailed history and writing a casereport;
- Illustrate examination procedures and techniques generally as well as for specific systems and make provisional diagnoses of common diseases;
- Describe laboratory investigations used for supporting the provisional diagnosis made after history taking and examinations;
- Analyse and interpret radiological investigations, biochemical investigations, sonography, EEG, ECG, EMG, echocardiography, CT, PET, MRI, etc for diagnostic and prognostic purposes..
- Analyse and interpret any further investigations required for the provisional diagnosis made.

Assessment Scheme:

Theory – 70 Marks

Internal Assessment – 30 Marks

MORDERN DIAGNOSIS PRACTICALS

- History taking and physical examination of cases.
- Case sheet writing in different general cases (25)
- Demonstration of equipments and instruments used for investigation in modern diagnostics
- Demonstration tour of an ultra modern super-speciality Hospital to see the latest techniques of modern investigations.

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

- Illustrate the procedures and nuances in approaching a patient and taking a detailed history and writing a casereport;
- Correlate examination procedures and techniques generally as well as for specific systems and make provisional diagnoses of common diseases;
- Delineate laboratory investigations used for supporting the provisional diagnosis made after history taking and examinations;
- Analyse and interpret radiological investigations, biochemical investigations, sonography, EEG, ECG, EMG, echocardiography, CT, PET, MRI, etc for diagnostic and prognostic purposes.
- Demonstrate knowledge of invasive tests such as paracentesis, thoracocentesis, lumbar puncture, laparoscopy, endoscopy, biopsy, etc., take a case history with examinations and prepare a detailed casereport.

6. Analyse and interpret any further investigations required for the provisional diagnosis made.

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

Subject: HUMAN VALUE

Subject: HPEV-01

Course: BNYS

COURSE CONTENT:

UNIT I: Introduction to Value Education

1. Value Education- Definition, Concept and Need..
2. The Content and Process of Value Education
3. Basic Guidelines for Value Education.
4. Self exploration as a means of Value Education.
5. Happiness and Prosperity as parts of Value Education.

UNIT II: Harmony in the Human Being

1. Human Being is more than just the Body.
2. Harmony of the Self (I) with the Body.
3. Understanding Myself as Co-existence of the Self and the Body.
4. Understanding Needs of the Self and the needs of the Body.
5. Understanding the activities in the Self and the activities in the Body.

UNIT III: Harmony in the Family and Society and Harmony in the Nature

1. Family as a basic unit of Human interaction and Values in Relationships.
2. The Basics for Respect and today's Crisis: Affection, Guidance, Reverence, Glory,
3. Gratitude and Love.
4. Comprehensive Human Goal: The Five Dimensions of Human Endeavour.
5. Harmony in Nature: The Four Orders in Nature.
6. The Holistic Perception of Harmony in Existence.

UNIT IV: Social Ethics

1. The Basics for Ethical Human Conduct.
2. Defects in Ethical Human Conduct
3. Holistic Alternative and Universal Order.
4. Universal Human Order and Ethical Conduct.
5. Human Rights violation and Social Disparities.

UNIT V: Professional Ethics

1. Value based Life and Profession.
2. Professional Ethics and Right Understanding.

3. Competence in Professional Ethics.
4. Issues in Professional Ethics - The Current Scenario.
5. Vision for Holistic Technologies, Production System and Management Models.

TEXT BOOKS

1. A.N Tripathy. New Age International Publishers. 2003.
2. Bajpai. B. L .New Royal Book Co. Luanow. Reprintal. Z304

7. SPA THERAPY **COURSE TYPE- SKILL ENHANCEMENT COURSE** **COURSE CODE - BNY 313**

1. **INTRODUCTION TO ANATOMY & PHYSIOLOGY**
Skeletal System Muscular System Nervous System Lymphatic System Cardiovascular System Digestive System Skin System
2. **HISTORY AND INTRODUCTION TO SPA**
Club spa Cruise ship spa Day spa Destination spa Medical spa
Mineralspring's spa
Resort/hotel spa
3. **Special Massage Therapy like Swedish Massage, Ayurveda Massage, Thai Massage, Aroma therapy**
4. **Spa Product Knowledge**
Herbs Essential Oils Aromatic Oils Preservatives
Active Ingredients
Carrier Oils & Base Creams Pre Blended Oils
Pre Blended Creams, Soaps, Shampoos, Lotions Licensing (Drug Control)
Product Testing Efficacy Shelf Life Storage Contamination Allergies
Product Handling Dispensing Self-Protection.

FINAL YEAR **1. NUTRITION DIETETICS AND HERBS** **Course type- Core Course** **Course code-BNY 401, BNY402P**

Credits-4

OBJECTIVE:

The objective of teaching Nutrition and Medicinal Herbs to undergraduate students is to enable them to analyse nutritional profiles of their patients and prescribe diets to them based on nutritional requirements, as well as use herbs in the management of various diseases.

THEORY

- I. Introduction of Nutrition:-
 - 1) History of Nutrition
 - 2) Progress in Food Science
 - 3) Basic Principles of Nutrition

- 4) Food , Nutrition & Health
- 5) Need of Complete Nutrition
- 6) Nutritional Basis of Life and Life in Connection with Food
- 7) Composition of Body in Relation to Nutrition

II. Components of Food and their Classification:-

- 1) Carbohydrates
- 2) Proteins
- 3) Lipids
- 4) Vitamins
- 5) Minerals and Trace Elements
- 6) Water and Electrolytes
- 7) Metabolism and Energy Needs of the body
- 8) Energy Balance and the regulation of the body weight
- 9) Enzymes

III. A. Food Groups:-

- 1) Cereals
- 2) Millets and Coarsegrains
- 3) Pulses
- 4) Green leafy Vegetables
- 5) Other Vegetables
- 6) Roots & Tubers
- 7) Fruits
- 8) Milk & Milk Products
- 9) Sugar & Jaggery
- 10) Honey
- 11) Nuts & Oil-seeds
- 12) Spices & Condiments

B. Nutritive Values of Food ingredients commonly used in India

IV. The Science & Fine Art of Food & Nutrition:-

- 1) Philosophy of Nutrition
- 2) Calories: Measuring what we eat.
- 3) Law of the Minimum
- 4) Organic foods & Organic acids
- 5) Organic Vs. Inorganic Foods
- 6) Salt Eating, Salt Stimulation Vs. Good Diet
- 7) Fruitarianism and Vegetarianism
- 8) Nature's Food Refinery
- 9) The Digestibility of Foods
- 10) Mental Influences in Nutrition
- 11) Enjoying our Food
- 12) Absorption of Food
- 13) Uses of Food
- 14) How much shall we eat?

- 15) How to Eat?
- 16) Correct Food Combining - Food Combining Charts
- 17) Effects Of Cooking
- 18) Uncooked Foods (Raw Eating)
- 19) Salads
- 20) Conservative Cooking
- 21) Effects of Denatured Foods
- 22) Under Nutrition
- 23) Hypo-Alkalinity
- 24) Diet Reform Vs. Supplemental Feeding
- 25) Beginning the Reform Diet
- 26) Building the teeth
- 27) The Eliminating Diet
- 28) Feeding In Disease
- 29) The Three Year Nursing Period
- 30) Cow's Milk
- 31) Pasteurization
- 32) Mother's Milk
- 33) Should Baby Be weaned?
- 34) No Starch for Infants
- 35) Three Feeding a Day
- 36) Feeding of Infants
- 37) Feeding Children From Two to Six Years
- 38) Man Shall Not Live With Food Alone
- 39) Our Denatured Soil

V. Food as Medicine – Known Facts

- 1) Proteins are Body Builders
- 2) Proteins can be Body Killers
- 3) Fats - Concentrated Body Fuels
- 4) How Foods May Poison?
- 5) Vegetables as Do It- Yourself Therapy
- 6) Solid Foods: When, What Kind, How Much?
- 7) Vitamins and Supplements for all ages
- 8) The Vitamins: Proof of natural food instincts
- 9) Facts about common foods
- 10) The Stimulant Delusion

VI. Food & Toxins

- 1) Infective agents & Toxins in food
- 2) Food Adulteration and Consumer Protection.
- 3) Food additives
- 4) Health hazards of added chemicals in foods
- 5) Nutrition & Infection
- 6) Study about adverse effect of Alcohol & Tobacco

VII. Nutritional Diagnosis

- VIII. Public Health and Nutrition-
- 1) Education in Nutrition
 - 2) Nutritional Program
 - 3) Nutrition Survey and Methodology
 - 4) Balanced Diets
 - 5) Nutritional assessments, Social aspects of the Nutrition
 - 6) Fortification and Enrichment
 - 7) Exercise in Balanced Diet
 - 8) Nutrition in relation to disaster management
 - 9) Nutritional requirements of special groups
- IX. Nutrition in Health-
- 1) Human Nutritional requirements
 - 2) Nutrition in Pregnancy, Lactation, Infancy, Childhood, Adolescence and Old Age
 - 3) Nutrition and Immunity
- X. Nutritional deficiency diseases, Preventive and Curative approach
- XI. The Optimum Nutrition Program for Correcting Disease & Restoring, Building and Maintaining Health

DIETETICS

THEORY

1. Concept of Health in Naturopathy
2. Dietetic principles in Naturopathy
3. Concept of wholesomediet
4. Medicinal values of Foods
5. Natural qualities / properties / character foods in Naturopathy / Ayurveda / Modern Nutrition
6. Natural food and health-
 - a) Importance of Green Vegetables, other vegetables, fruits and the ingredients
 - b) Chemical Composition of different raw juices, their effects and uses-Ginger, Raddish, Bottlegourd, Wheat grass, Beetroot, Cabbage, Carrot, Cucumber, Lettuce, Garlic, Onion, Lemon, Papaya, Knol-kol, Pineapple, Mango, Tomato, Pomegranate, Grapes, Apple, Bittergourd, Ashgourd, Bael fruit, Spinach, Pumpkins, Watermelon, Indian Gooseberry, Orange, Sweet Lime, whey water & Neera etc.
 - c) Sprouts, their Nutritive Values and Methods of Sprouting
 - d) Food Values in Raw states, germinated form and Cooked form
 - e) Comparison with raw and cooked foods
7. Diet for Physical Labor & Mental work
8. Arguments from comparative Anatomy, Physiology, Chemistry & Hygiene
9. Naturopathic Hospital dietetics and their classification
10. Disease management with diet
Diabetes, Renal diseases, Anaemia, PEM, Peptic Ulcer, Constipation, Malabsorption syndrome, Liver diseases like Jaundice, Fatty liver etc. HBP, LBP, Atherosclerosis,

- Gall Bladder disease, Cancer and arthritis
11. Food allergy and dietary management
12. Diet for Weight Reduction & Weight Gaining
13. Dietary modification for specific condition
14. Dietary reaction for a different population groups with special reference to pregnancy, lactation, Infancy
15. Seasonal changes in the dietary pattern in Ayurveda/Naturopathy and Modern nutrition
16. Food, Sanitation, hygiene and health
17. Naturopathic approach towards vegetarian and non-vegetarian food
18. Harmful effects of the food colours, preservatives, pesticides, artificial manures
19. Dietary fibre and its therapeutic effects (e.g. constipation, ano-rectal disorders, colonic disorders, GIT disorders, D.M. etc.)
20. Geriatric nutrition and diet
21. Diet in exercise, sports, games and athletics
22. Paediatric Nutrition
23. Nutrition and life Span: How to Prolong Life & Postpone Death?
24. Diet, Fasting and Disease.
25. Vegetarianism: Its Positive and Negative aspects in Naturopathy
26. Customs and manners of eating: Different views, Effect of emotional state on food utilisation
27. Kalpa therapy in Naturopathy: Grapes, Mango, Matha, Milk etc.
28. Ideal Diet, China study & Genuine Health Care
29. Food, Eating, Self-Healing, Recovery of vigor
30. Drugs Increase Nutritional Requirements
31. Toxicless Diet, Body Purification & Healing System
32. How Vitamin-C keeps you Young, Natural Anti-oxidants
33. Question of Quality & Quantity of Food
34. Hygienic Food & Hygienic Cookery
35. Physio-Pharmacology of Foods:-
 - A) Anti- Bacterial / Anti-Septic Foods
 - B) Anti- Coagulant Foods
 - C) Anti- Depressant Foods
 - D) Anti- Diabetic Foods
 - E) Anti- Diarrhoeal Foods
 - F) Anti-Inflammatory Foods
 - G) Anti-Oxidant Foods
 - H) Anti-Viral Foods
 - I) Anti- Hypertensive Foods
 - J) Calming & Sedative Foods
 - K) Anti-Cancerous Foods
 - L) Carminative Foods
 - M) Cholesterol Lowering Foods
 - N) Diuretic Foods
 - O) Immunity Enhancing Foods
 - P) Life Prolonging Foods
 - Q) Memory Enhancing Foods
 - R) Expectorant Foods

- S) Oestrogenic Foods
- T) Analgesic Foods
- U) Aphrodisiac Foods
- V) Anti-Ulcer Foods
- W) Anti-Pyretic Foods
- X) Anti-Spasmodic Foods
- Y) Spoliative & Sudorific / Diaphoretic Foods
- Z) Eliminative Foods
- Aa) Cooling & Heating Foods
- Ab) Anti- Emetic Foods
- Ac) Purgative & Laxative Foods

1. HERBOLOGY

THEORY

- a. Introduction to Herbology. The following herbs are to be studied with respect to their source and therapeutic uses.
- b. Botanical details shall be avoided.
- c. Botanical Name:-
 - 1. Emblica Officinalis.
 - 2. CassiaFistia.
 - 3. Ficus Glomerata.
 - 4. Veliverta Zizanodies
 - 5. Cinnamomum Camphora
 - 6. Monardica Charantia
 - 7. Tribulus Terrestris
 - 8. Myristiba Fragrans
 - 9. Cuminim Cyminum
 - 10. Sesamum Indicum
 - 11. Ocimumsanctum
 - 12. Punica Granatum.
 - 13. Coriandrum Sativum.
 - 14. AzadirachtaIndica.
 - 15. Allium Cepa.
 - 16. Piper Longum
 - 17. Psoralea Corylifolia
 - 18. Taxus Baccata
 - 19. Aegle Marrnelos
 - 20. Semecarpus Anacardium
 - 21. Phyllanthus Niruri
 - 22. Piper Nigrum
 - 23. Santhalam Album
 - 24. Santhalam Album
 - 25. Allium Sativam
 - 26. Mimosa Pudica
 - 27. Acorus Calamus
 - 28. Asparagus Racemosus

29. Rauwoffia Serpentina
30. Curcuma Longa
31. Terminalia Chebula
32. Ferula Narthex
33. Syzygium Aramaticum
34. Terminalia Belerica
35. Ginger Officinalis

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

- a) Describe fundamentals of nutrition, with respect to different nutrients and food groups;
- b) Illustrate details of nutritional requirements for different age groups, as well as pregnant and lactating women;
- c) Classify modern nutrition to traditional Naturopathic diets;
- d) Illustrate the use of specific herbs in common diseases, with therapeutic values.
- e) Analyse the nutritional status of a patient; Plan, implement and evaluate nutritional advice for people of different ages and patients of different diseases, including the use of herbs.

Assessment Scheme:

Theory – 70 Marks

Internal Assessment – 30 Marks

NUTRITION DIETETICS AND HERBS PRACTICALS

1. Visits to the dietetic department of the hospital
2. Menu planning using natural foods and raw foods in general patients
3. Demonstration of sprouts
4. Preparation of low cost balanced diet for different population groups using natural foods
5. Modification of normal diet in consistency-liquid full soft
6. Canteen duties at nature curehospital
7. Knowledge of Sathvic food preparation at nature curehospital
8. Visit to different nutrition centres like NIN - Hyderabad, CFTRI (Mysore)

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

- a) Understand the procedures and nuances in approaching a patient and taking a detailed history and writing a casereport;
- b) Illustrate examination procedures and techniques generally as well as for specific systems and make provisional diagnoses of common diseases;
- c) Describe laboratory investigations used for supporting the provisional diagnosis made after history taking and examinations;
- d) Analyse and interpret any further investigations required for the provisional diagnosis made

2. OBSTRETRICS ANDGYNAECOLOGY

Course type- Core Course

Course code–BNY 403, BNY404P

Credits-6

OBJECTIVE:

The objective of teaching Obstetrics and Gynecology to undergraduate students is to provide them with the comprehensive knowledge of anatomy, physiology and pathophysiology of the reproductive system and gain the ability to optimally manage common problems.

- **Objectives:**
- **Knowledge:**

After the completion of the course, the student shall be able to:

1. Delineate the anatomy, physiology and patho physiology of the reproductive system and the common conditions affectingit;
2. Detect normal pregnancy, labor, and puerperium;
3. Elucidate the leading causes of maternal and perinatal morbidity and mortality;
4. Understand the principles of contraception and various methods employed, methods of medical termination of pregnancy, sterilization and their complications;
5. Recognize the use, abuse and side effects of drugs in pregnancy, pre- menopausal and post-menopausal periods;

6. Explain the national programmes of maternal and child health and family welfare and their implementation;
 7. Assess different gynecological diseases and describe principles of their management;
 8. Explain the indications, techniques and complications of procedures like Caesarean section, laparotomy, abdominal and vaginal hysterectomy, and vacuum aspiration for Medical Termination of Pregnancy (MTP).
- **Skills:**

After the completion of the course, the student shall be able to:

1. Examine a pregnant women, recognize high risk pregnancies and make appropriatereferrals;
 2. Recognise complications of delivery and provide postnatalcare;
 3. Recognize congenital anomalies ofnewborn;
 4. Advise a couple on the use of various available contraceptive devices;
 5. Perform pelvic examination, diagnose and manage common gynaecological problems including early detection of genital malignancies;
 6. Interpret data of investigations like biochemical, his to pathological, radiological, ultrasoundet.
- **Integration**
At the completion of training, the student should be able to integrate knowledge of Obstetrics and Gynaecology to manage related ailments and educate masses on family planning norms.

THEORY

Section-A

1. Basic Anatomy & Physiology:-
 - a) Anatomy and Physiology of female genital organs and pelvis.
 - b) Maturation and fertilization of ovum.
 - c) Development of placenta.
 - d) Embryology of uterus.
2. Physiology of Pregnancy:-
 - a) Maternal changes due to pregnancy
 - b) Diagnosis of pregnancy
 - c) Differential diagnosis of pregnancy
 - d) Foetus in normal pregnancy
 - e) Ante-natal care.
3. Physiology of Labour:-
 - a) Causation and stages of labour
 - b) Mechanisms oflabour
 - c) Conduct of Delivery - the Naturalmeans.
4. Physiology of Puerperium
 - a) Phenomena of normal puerperium
 - b) Care of Pure perium
 - c) Care of new-born child

5. Pathology of Pregnancy
 - a) Hyperemesis gravidarum
 - b) Anaemia in pregnancy
 - c) Diseases of urinary system
 - d) Diabetes in pregnancy
 - e) Abortion
 - f) Ectopic pregnancy
 - g) Ante-partum haemorrhage
 - h) Placenta previa
6. Pathology of Labour
 - a) Occipito - posterior position
 - b) Breech presentation
 - c) Multiple pregnancy
 - d) Contracted pelvis
 - e) Management of labour in contracted pelvis
 - g) Complications of 3rd stage of labour
7. Affection of New-Born
 - a) Asphyxia neonatorum
 - b) Preterm baby
8. Obstetrical Operations
 - a) Forceps
 - b) Caesarean section
 - c) Induction of abortion and labour
9. Pathology of Puerperium Puerperal infections
10. Miscellaneous
 - a) Perinatal mortality and Maternal mortality
 - b) Post-dated pregnancy
 - c) Placenta insufficiency.
 - d) Control of contraception
 - e) Medical Termination of Pregnancy.
 - f) Pre-term labour.
11. Naturopathic Application:
 - a) Hydrotherapy in Pregnancy
 - b) Importance of Naturopathic Diet in Pregnancy & Puerperium
 - c) Under water delivery
12. Yogic application:
 - a) Exercises in - Ist Trimester IIrd Trimester IIIrd Trimester Puerperium
 - b) Pelvic Floor Exercises

13. Natural Child birth
14. Birth Control: Natural and Unnatural
15. Holistic Approach to menstrual Problems
16. Vaginitis: A Natural Approach
17. Breast Cancer Can Be Prevented
18. Varicose Veins: Prevention and Treatment
19. Understanding the Pregnancy: The Miracle of Creation
20. What Smoking Does to Women?
21. Depression : A New Epidemic
22. What Woman Should Know About Anaemia?
23. Overweight: Must It Be A Lifetime Struggle?
24. Menopause: Dreadful Affliction or Glorious Experience?
25. Uterine Tumors can Be Prevented

Section - B

1. Gynaecological diagnosis
2. Malformation of Female genitalorgans
3. Diseases of vulva
4. Diseases of vagina
5. Sexually transmitted diseases in female
6. Diseases of urinary system
7. Trophoblastic diseases
8. Disorders of menstruation
9. Prolapse of uterus
10. New Growths of uterus
11. Endometriosis and adenomyosis
12. Diseases of ovary
13. Pelvic inflammatory diseases

COURSE OUTCOME

After the completion of the course, the student shall be able to:

- a) Illustrate the anatomy, physiology and pathophysiology of the reproductive system and the common conditions affecting it, Detect normal pregnancy, labor, and puerperium;
- b) Classify the leading causes of maternal and perinatal morbidity and mortality;
- c) Understand the principles of contraception and various methods employed, methods of medical termination of pregnancy, sterilization and their complications;

- d) Describe the national programmes of maternal and child health and family welfare and their implementation;
- e) Analyse different gynecological diseases and describe principles of their management, different techniques.
- f) Analyse a pregnant women, recognize high risk pregnancies and make appropriate referrals;

Assessment Scheme:

Theory – 70 Marks

Internal Assessment – 30 Marks

PRACTICALS

- 1. History taking of ante-natal and gynaecological cases
- 2. Demonstration of physical examination of ante-natal and gynaecological cases
- 3. Demonstration of conductive labour, normal delivery and use of minor instruments during Delivery
- 4. Demonstration of various equipments used in obstetrics and gynaecology
- 5. Case -history writing of ante-natal and gynaecological cases (25)

COURSE OUTCOME

After the completion of the course, the student shall be able to:

- a) Illustrate the anatomy, physiology and pathophysiology of the reproductive system and the common conditions affecting it, Detect normal pregnancy, labor, and puerperium;
- b) Classify the leading causes of maternal and perinatal morbidity and mortality;
- c) Understand the principles of contraception and various methods employed, methods of medical termination of pregnancy, sterilization and their complications;
- d) Describe the national programmes of maternal and child health and family welfare and their implementation;
- e) Analyse different gynecological diseases and describe principles of their management, different techniques.
- f) Analyse a pregnant women, recognize high risk pregnancies and make appropriate referrals;

|--|----------------|

3. YOGA THERAPY

Course type- Core Course

Course code – BNY 405, BNY 406P

Credits-5

1. Objective

The objective of teaching *Yoga* Therapy to undergraduate students is to provide them with comprehensive knowledge of *Yoga* and the physiological effects of various *yogic* practices and utilisation of the same for therapeutic purposes.

THEORY

1. Introduction to Yogic Therapy / Basis of Yogic Therapy
2. Role of Asanas in curing various diseases
3. Specific importance of Pranayama in curing various diseases
4. Vital role of Bandhas, Mudras, Drishtis, in curing various diseases
5. Role of Shat-kriyas in curing various diseases particularly digestive disorders
6. Role of general exercises
7. The effects of various Yogic practices on different systems Viz: Skeletal system, Endocrine System, Nervous system, Digestive System, Respiratory system, Excretory system, Cardio-vascular system, Muscular system, Reproductive system
8. Research methods in yogic therapy, statistical analysis etc.
9. Yogic therapy for:
 - a. Cardio-Vascular diseases
 - b. Psychiatric diseases
 - c. Mental retarded diseases
 - d. Neuro-Muscular diseases
 - e. Gastro-intestinal diseases
 - f. Hormonal diseases
 - g. Respiratory disorders
 - h. Metabolic disorders
 - i. Ophthalmologic disorders
 - j. Paediatric disorders
 - k. E.N.T. Disorders
 - l. Obstetrics & Gynecology disorder
10. Meditation and its applications on psycho-somatic disorders
11. Yoga & Relaxation Techniques
 - a. QRT-Quick Relaxation Technique
 - b. IRT - Instant Relaxation technique
 - c. DRT-Deep Relaxation technique
12. Teaching methods of Yoga to Public, Students and patients. Model lesson planning and adoption of Yoga in education system, limitations, vidhi and Nisheda (right and wrong)
13. Workshop on Yogic therapy

14. Dessertations
15. Advanced techniques of Yoga therapy
16. Pranic Healing & Reiki Therapy
17. Yoga and Mental health-Total integration of personality, correct mental behaviour and attitude, harmonial relationship of body and mind, self content tranquilising effect, psychology of spiritual growth and spiritual value, toning judgement, pure consciousness, mode of living and disciplined life.
18. Applied psychology:-
 - a. Stress -Its causes, effects and control
 - b. Historical perspective, Identifying psychological disorders
 - i. Anxiety Disorders
 - ii. Dissociative Disorders
 - iii. Somato form Disorders
 - iv. Sexual Disorders
 - v. Mood Disorders
 - vi. Personality Disorders
 - vii. Schizophrenia
 - c. Therapy for psychological disorders psychotherapy, therapy of Interpersonal relations, behavioral therapy

COURSE OUTCOME

After the completion of the course, the student shall be able to:

1. Describe the physiological effects of various *yogic* practices like *kriyas*, *asanas*, *pranayamas*, *mudras*, *bandhas*, *drishtis*, Guided relaxation and Meditation;
2. Define rules and regulations of *Yoga* to be followed;
3. Understand the therapeutic aspects of *Yoga* as applied to different disease conditions;
4. Illustrate the concept of health and disease in *yogic* lore and role of stress in disease causation and management of the same with *Yoga*;
5. Analyse knowledge of *Yoga* therapy in managing various diseases;
6. Demonstrate usage of therapeutic aspect of *Yoga* in promotive, preventive, curative and rehabilitative therapy.

Assessment Scheme:

Theory	–	70 Marks
Internal Assessment	–	30 Marks

1. YOGA THERAPY PRACTICAL

Demonstration and instructions of advanced yoga posture, kriyas, meditation, and advanced yoga practices.

Case discussion -25

COURSE OUTCOME-

After the completion of the course, the student shall be able to:

1. Demonstrate basic understanding of procedures of stretching and exercises;
2. Deliver a meditative session using any of the meditative styles;
3. Describe fundamentals of yoga, with respect to its principles;

4. Analyse the patient, and modulate a yoga session for the same.

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 marks
Practical viva	- 30 marks
Practical internal assessment	- 10 Marks

5. HYDROTHERAPY

Course type- Core Course

Course code – BNY 407, BNY 408, BNY 409P

Credits-4

OBJECTIVE:

The objective of teaching Hydrotherapy and Mud Therapy to undergraduate students is to provide them with comprehensive knowledge of treating diseases using water and mud, and the physiological effects of various kinds of such applications, and utilisation of the same for therapeutic purposes.

Objectives:

● Knowledge:

After the completion of the course, the student shall be able to:

- a. Describe the properties and chemical composition of water and mud used for therapeutic purposes, physiology of the skin, production of heat and body temperature regulation, which are essential as a foundation for hydrotherapy.
- b. Illustrate physiological effects of hot and cold water upon the different systems of the body and applications to reflex areas;
- c. Explain action and reaction mechanisms and physiology, with their effects and uses
- d. Demonstrate use of water in preservation, acute diseases, chronic diseases;

- e. Show in-depth knowledge of general principles of hydrotherapy, therapeutic applications of water, along with therapeutic actions, indications and contra-indications; and classification of mud, storing of mud, modes of mud treatment, cosmetic uses of mud and research updates in hydrotherapy and mud therapy;
- f. Demonstrate techniques and procedures of various types of hydrotherapeutic applications;

● **Skills:**

After the completion of the course, the student shall be able to:

1. Utilise knowledge of hydrotherapy and mud therapy in managing various diseases;
2. Demonstrate usage of therapeutic aspect of hydrotherapy and mud therapy treatments in promotive, preventive, curative and rehabilitative therapy.
3. Institute and evaluate remedial measures in hydrotherapy for various disease conditions in clinical as well as research settings.

● **Integration**

At the completion of training, the student should be able to integrate knowledge of hydrotherapy in various diseases and efficiently utilise the same for therapeutic purposes.

THEORY
PAPER-I

1. Introduction and History
2. Physical properties and chemical composition of water
3. Physiological basis of Hydrotherapy:- The Skin and its anatomical construction, functions of the body
4. Production of heat and its distribution in the body, regulation of the body temperature, conditions that increase and decrease heat production in the body, body heat and body temperature
5. Importance of water to human body.
6. Physiological effects of water on different systems of the body
 - i) General and Physiological effects of heat upon:-
 - a. Skin
 - b. Respiration
 - c. Circulation
 - d. Nervous System
 - e. Heat and its production, dissipation etc.
 - f. Tactile and temperature sense
 - ii) General and physiological effects of cold upon skin, respiration, circulation, nervous system, G.I.T., Body temperature and its maintenance.
7. Reflex areas of the body, results of the application of hot and cold over reflex areas
8. Action and reaction, incomplete reaction, Conditions that encourage and discourage reaction, internal reaction, thermic reaction, modified thermic reaction
9. Place of water in preservation
10. Place of water in Acute diseases
11. Place of water in Chronic diseases
12. Magnesium sulphate - use in Hydrotherapy

Assessment Scheme:

Theory	–	70 Marks
Internal Assessment	–	30 Marks

PAPER - II

1. General Principles of Hydrotherapy
 - a) General rules of hydrotherapy
 - b) Therapeutic significance of reaction
 - c) Adaptation of individual cases
 - d) Exaggeration of symptoms under treatment, the untoward effects and how to avoid them
 - e) General indications and contra- Indications

2. Therapeutic actions and use of Hydro therapy:
 - a) Classification of Hydriatic effects, General principles excitation and Depression
 - b) Primary excitant effects when to apply and when not to apply
 1. Local haemostatic effects
 2. Cardiac effects Hydratic heart tonics
 3. Uterine excitations, emanogogic effects
 4. Vesical excitations
 5. Intestinal excitations, peristaltic effects
 - c) Secondary excitant effects:-
 1. Restorative effects.
 2. Tonic effects of cold water, physiological effects of cold water, Cold water Vs. Medical tonics, application diseases.
 3. Anaemia, Neurasthenia, Hypochondria Cerebral congestion, Rheumatism, Diabetes mellitus, Valvular heart diseases.
 4. Calorific effects.
 5. Diaphoretic effects.
 - Importance of attention to the skin in Chronic diseases - alternative & qualitative effect - Hot bath in Bright's diseases, Sweating baths in dropsy and obesity, Depurative or eliminative effects, Toxemia in Rheumatism.
 6. Expectorant effects.
 7. Diuretic effects - Bright's disease, Uremia - eclampsia.
 8. Atonic Dyspepsia, Hyperacidity
 9. Revulsive and derivative effects, flexion, revulsive methods for Combating superficial anaemia and for relief of deep congestion method adopted to anaemia of deep seated organs revulsion on analgesic measure.
 - d) Resolvent effects, sedative effects- general sedatives - local sedatives.
 - i) Sedatives of the circulatory system-antiphlogistic effects, inflammation, pneumonia, pleurisy and other acute disorders.
 - ii) Nerve sedatives, hypnotic, calmative analgesic, anesthetic, antispasmodic, insomnia, chorea, spastic paralysis, exophthalmic goiter, mania, epilepsy and various painful conditions.

- iii) Anti- thermic and antipyretic effects, relation of heat production and heat elimination to antipyretic methods, principles that govern the application of hygienic measures for the reduction of temperature in fevers , methods that may be efficiently employed in various morbid conditions and effects, indications and contra- indications.
- iv) Secretory and sedative effects - prophylactic uses.
 - a. Cold bathing in infancy and early childhood.
 - b. The cold bathing for Adults.
 - c. The cold baths for women.
 - d. The cold bath in old age- precautions.
- 3. The techniques of Hydrotherapy:- Plain water bath:-
 - Cold hip bath - Kellogg's & Kuhne's sitz bath
 - Shallow bath - for males, females hand and arm
 - Graduated bath bath, foot bath, hot and cold
 - Natural bath alternative leg bath
 - Non revulsive bath
 - Immersion bath
 - Cold plunge bath
 - Whirl pool bath
 - Aeration bath
 - Vichy spray massage
 - Rapid bath, Brand -bath, Fever bathing, Sea bathing.
- 4. Various baths and air baths, Russian bath, Turkish bath, Steam inhalation, Hot air bath, Local hot air bath, Super hot air bath, Cold air bath, Indoor and out-door baths.
- 5. Pool Therapy:-
 - a) Introduction
 - b) Principles of treatment Part I and Part II.
 - c) Physiological and Therapeutic effects of exercise in warm water.
 - d) Indications and contra -indications.
 - e) Dangers and precautions.
- 6. Douches :- Cold Douche
 - Hot Douche
 - Neutral Douche
 - Alternative Douche
 - Under water Douche
 - Contrast Douche
 - Horizontal Jet
 - Cephalic Douche
 - Lumbar Douche
 - Fan Douche
 - Rain Douche or Shower Douche
 - Heptic Douche
 - Circular Douche and Semi Circular

Douche Cerebrospinal Douche
Plantar Douche
Percussion Douche
Scotch Douche
Revulsive Douche
Ascending Douche
Calliper Douche
Filiform Douche
Fog Douche
Massage Douche
Shoulder Douche
Thoracic Douche
Abdominal Douche
Anal Douche
Perineal Douche
Pulmonary Douche
Cardiac Douche
Gastric Douche
Enteric Douche
Renal Douche
Articular Douche
Vapour Douche

7. Fomentation and Stupes:-
The hot water bag, the siphon hot water bag, the thermopore, the mustard Fomentation, clay and glycerin poultice, charcoal poultice, cotton poultice.
8. Compresses and Packs:-
The wet sheet pack, cooling pack, cold shower pack, sweating pack, very cold compress, proximal compress, neutral compress, alternate compress, repulsive compress, compress of ten days for injuries and eruptions, alternative ten applications to the head and spine, local packs, wet girdle pack, dry abdominal bandage.
Abdominal heating compress, Head pack, Spinal pack
Hot and cold heat compress, Hot and cold lung compress
Hot and cold gastro-hepatic compress
Hot and cold renal compress
Hot and cold intestinalcompress
Hot and cold pelvic compress
Hot and cold abdominal pack
Hot and cold spinalpack
Hot and cold pancreatic pack

SPECIAL FORMS OF COMPRESS:-

Cephalic compress, Chest pack, Triangular chest Pack, Half chest compress, Joint compress, Pelvic pack, Foot pack, Cold spinal compress, Towel chest Pack, Pericardial or cardiac compress, Hip pack, Perineal compress, Prone Packs , Lumbar compress.

9. Internal Use of Water:-

Irrigations and enema (Colon Flushing)
 Cold water drinking, Hot water drinking.
 Water emetic, irrigation of ear, Nasal Irrigation,
 Vaginal irrigation, Intra-uterine irrigation, rectal
 irrigation. Enema :- Hot, warm, Cold, graduated enema.
 Coloclyster, Retentive enema, Tonic Enema.

Hydriatic Prescription Making:-

- a. The natural defense of the organism.
- b. Procedures for increasing vital resistance.
- c. Procedures which excite the central ganglia.
- d. Procedures that increase oxidation.
- e. Measures that encourage general and local metabolic activity.
- f. Procedures that increase general blood movement and local blood supply.
- g. Measures that increase heat production.
- h. Measures that increase the elimination of heat.
- i. Measures that combat bacterial development of blood.
- j. Measures that increase/lessen heat elimination.
- k. Hydratic incompatibility.
- l. Hydrotherapy as a means of rehabilitation and health promotion.
- m. Emergency treatments in Hydro therapy.

10. Mud Therapy:-

- a) Introduction to Mud Therapy.
- b) Classification of mud for therapeutic use.
- c) Precautions for storing mud.
- d) Methods of treatment of mud - applications, packings, hot poultices, effect of mud on different systems of body.
- e) Natural mud bath, full and partial mud packs, mud plaster, thermal bath, dry pack, sand pack and sand baths.
- f) Cosmetic uses of mud.

COURSE OUTCOME

After the completion of the course, the student shall be able to

1. Describe the properties and chemical composition of water and mud used for therapeutic purposes, physiology of the skin, production of heat and body temperature regulation, which are essential as a foundation for hydrotherapy.
2. Illustrate physiological effects of hot and cold water upon the different systems of the body and applications to reflex areas;
3. Explain action and reaction mechanisms and physiology, with their effects and uses
4. Demonstrate use of water in preservation, acute diseases, chronic diseases;
5. Correlate general principles of hydrotherapy, therapeutic applications of water, along with therapeutic actions, indications and contra-indications; and classification of mud, storing of mud, modes of mud treatment, cosmetic uses of mud and research updates in hydrotherapy and mud therapy;
6. Demonstrate techniques and procedures of various types of hydriatic applications.

Assessment Scheme

Theory – 70 Marks

Internal marks – 30 Marks

HYDROTHERAPY PRACTICALS

Demonstration of various therapeutic Procedure and treatments in Hydrotherapy during clinical classes at the hospital.

At the end of final B.N.Y.S. Course, candidate should be in a position to give treatments independently.

COURSE OUTCOME

After the completion of the course, the student shall be able to

- Demonstrate use of water in preservation, acute diseases, chronic diseases;
- Correlate general principles of hydrotherapy, therapeutic applications of water, along with therapeutic actions, indications and contra-indications; and classification of mud, storing of mud, modes of mud treatment, cosmetic uses of mud and research updates in hydrotherapy and mudtherapy;
- Demonstrate techniques and procedures of various types of hydrotherapeutic applications.

Assessment Scheme

Practical Assessment	- 90 Marks
Theory viva	- 60 Marks
Practical viva	- 30 Marks
Practical internal assessment	- 10 Marks

TEXTBOOKS:-

- Baths – By S.J.Singh.
- My Water Cure - By Sebastian Kneipp.
- Rational Hydrotherapy - By Dr. J.H. Kellogg.
- The Healing Clay - By Michel Adsera.
- Our Earth and Cure - By Raymond Dextroit.

REFERENCE BOOKS

- Hand Book of Hydrotherapy - By Shew, Joel.
- Hydrotherapy in Practice - By Davis, B.C. & Harrison, R.A.
- Medical Hydrology - By Sidney Licht.

5. PHYSIOTHERAPY

Course type- Core Course

Course code – BNY 410, BNY 411P

Credits-1.5

Objective:

The objective of teaching Physical Medicine and Rehabilitation to undergraduate students is to provide them with the knowledge and skills needed for utilisation of Physical medicine for therapeutic, rehabilitative purposes.

THEORY

- I. Basic Physics in exercisetherapy:-
 1. Mechanics:- Force. Gravity, Line of gravity, center of gravity in human body, base, Equilibrium. Andplanes.
Mechanical Principles:- Lever, Order of Lever, examples in human body, Pendulum, Spring.
 2. Introuduction to Exercise Therapy:-
 3. Starting Position:- Fundamental Starting positions, derived position, Muscle work for all the fundamental startingpositions.
 4. Classification of movements in detail:-
 - a) Voluntarymovements.
 - b) Involuntarymovements
 5. Activemovements
 6. Passivemovements
 7. Muscle strength:-
Anatomy and physiology of muscle tissue, causes of muscle weakness/paralysis, preventing of muscles weakness/ paralysis, types of muscle work and contractions, range of muscle work, muscle assessment.
Principles of muscle strengthening / re-education, early re-education of Paralyzed muscles
 8. Joint movement:-
Classification of Joint movements causes for restriction of joint movement, prevention ofrestriction of joints range of movements, Principles of mobilizations of joint in increasing the range of motion. Technique of mobilization of stiff joint.
 9. Relaxation:- Techniques of relaxation, Principles of obtaining relaxation in various positions.
 10. Posture:-Types, factor responsible for good posture, factor for poor development of goodposture.
 11. Co-ordinadion exercises:-Definition of co-ordinated movements, in-coordinated movements.
 12. Principles of co-ordinated movements, technique of co-ordination exercise.
 13. Gait- Analysis of normal gait with muscles work, various pathologicalgaits.
 14. Crutch Gait:- Introduction, crutch measurement, various types of crutch gait

(indetails)

15. Neuro- muscular facilitation techniques, functionalre-education.
16. Suspension Therapy:- Principles of suspension, types of suspension therapy, effects and uses of suspension therapy, their application either to mobilize a joint or to increase joint range of motion to increase muscle power, explaining the full details of the components used for suspensiontherapy

ELECTROTHERAPY

THEORY

1. Electrical fundamentals, physical principles, structure and properties of matter, molecular atom, proton, neutron, electron, ion, etc., Electrical energy: Nature of electricity current, static electricity current, Electric potentials generated by cell, ohm's law, joule's law, Magnetic Energy: Nature and property of a magnet, magnetic induction, Show rule, maxwell's cork-screw rule.
Electro magnetic induction, principle and working of choke, coil, transformer, rectification of A.C. to D.C., Metal oxide Rectifier, semiconductor, Diode and triode, valves, principles of working in a capacitor, details of charging and discharging etc. Transistors, measurement of current intensity,EMS and power, moving coil milometer and voltmeter.
2. Low Frequency Currents:-
Nature and principle of production of muscles stimulating currents, types of low frequency currents used for treatment, Therapeutic electric stimulation, Intophoresis.
3. Preparation for electro therapy, preparation of apparatus, patient treatment technique. Stimulating the muscles of extremity, back and face through the motorpoints.
4. Faradic and galvaniccurrents.
5. High frequency current treatments:-
Physics of high frequency currents, production of high frequency currents, principles, Bio Physics of heat, Physiology of heat and cold, Production, Physiological and therapeutic effects and uses. Technique of Treatments, Dangers and precautions, contra-indications of the following.
 - a) Short wave Diathermy
 - b) Microwave Diathermy
 - c) Ultrasonic Therapy
6. Principles of radiation therapy, physics of radiation therapy, laws governing radiation, Production. Physiological and therapeutic effects, uses, techniques of treatment, dangers and precautions, contraindication, etc. of the following.
 - a) Infrared radiationtherapy.
 - b) Ultraviolet radiationtherapy
 - c) Basic principles of transcutaneous nerve stimulation and interferentialtherapy.

- d) Wax therapy-physics-physiological and therapeutic effect and uses, Techniques of application.

COURSE OUTCOME

After the completion of the course, the student shall be able to:

1. Illustrate principles of basic physics that act as a foundation for physical medicine
2. Describe exercise therapy in detail, including starting positions, movements and their types, muscle strength, joint movement, relaxation, posture, co-ordination, gait, walking aids, neuromuscular facilitation, suspension therapy and their therapeutic applications, including allied modalities like heat treatments and cryo therapy;
3. Understand electrotherapy in terms of fundamentals, principles, laws of electricity and magnetism, practical and theoretical aspects of electrotherapeutic applications, such as faradic and galvanic currents, high frequency currents, laser, ultrasound, radiation therapy (IR & UV), TENS and IFT.
4. Demonstrate usage of therapeutic applications of physical medicine in promotive, preventive, curative and rehabilitative therapy, focusing on rehabilitation.
5. Analyse remedial measures in *Yoga* for various disease conditions. PRACTICALS I
 - (1) Interrupted/modified D.C.
 - (a) Stimulation of muscles directly.
 - (b) Diagnostic tests
 - (I) F.G. Test.
 - (II) S.D. Curve
 - (III) Fatigue Test.
 - (2) Uses of surged faradism and interrupted galvanism in various peripheral nerve lesions.
 - (a) Neuroproxia
 - (b) Axonotomosis.
 - (c) Neurotosis

PRACTICALS II

(High frequency current treatment)

- (a) Shortwave diathermy-setting up of apparatus including selection of method and electricity, Techniques, preparation of patient, checking, contra indications, application of SWD for various conditions and various parts of the body. Those must be practiced by the students.
- (b) Microwave diathermy-setting up of apparatus including selection of method and electricity, Techniques, preparation of patient, checking, contra indications, application of MWD for various condition and various parts of the body. Those must be practiced by the students.
- (c) Ultraviolet radiation: setting up of apparatus including selection of lamps technique of application of UVR for various conditions like test dose, general body bath, acne vulgaris, alopecia areata and total is, ulcers, psoriasis, rickets and general debility patients.
- (d) Ultrasonics: setting up of apparatus, selection of dose, technique of application in various Condition and to various parts of the body.

PRACTICALS III

- (1) Demonstration and practice of Active and passive movements.
- (2) Demonstration and practice of putting suspension to shoulder joint, Elbow joint in upper limb, hip joint and knee joint in lower limbs for all movements. Demonstration of total suspension.
- (3) Muscle strength: Demonstration and practice of strengthening, re-education of weak/paralysed muscles of both upper and lower extremity, individual group muscles, abdominal muscle exercises.
- (4) Joint movements: Demonstration and practice of techniques to improve joint range of motion of hip joint, knee joint, ankle and foot in lower limb, shoulder joint, elbow joint, radio-ulnar joint, wrist joint & upper limb.
- (5) Demonstration and practice of free exercise to improve joint range of motion (Small joints, eg. hand, finger, toes etc.) Demonstration and practice of all crawling exercises, faulty posture. Correcting techniques.
- (6) Demonstration of various pathological gaits.
- (7) Measurement of crutches, walking aids, strengthening of crutch muscles, crutch balance, Demonstration and practice of all crutch gaits.
- (8) Breathing Exercises: Demonstration and practice of Diaphragmatic breathing, localised expansion exercises.
- (9) Passive stretching: Techniques of passive stretching to sternomastoid muscle, shoulder abductors, flexors elbow flexors, supinator, wrist and finger flexors in upper limbs passive stretching to hip flexors, Adductors, ilio-tibial band, tensor fascia lata, quadriceps, knee flexors, tendo achilles etc.

COURSE OUTCOME

After the completion of the course, the student shall be able to:

1. Illustrate principles of basic physics that act as a foundation for physical medicine
2. Describe exercise therapy in detail, including starting positions, movements and their types, muscle strength, joint movement, relaxation, posture, co-ordination, gait, walking aids, neuromuscular facilitation, suspension therapy and their therapeutic applications, including allied modalities like heat treatments and cryotherapy;
3. Understand electrotherapy in terms of fundamentals, principles, laws of electricity and magnetism, practical and theoretical aspects of electrotherapeutic applications, such as faradic and galvanic currents, high frequency currents, laser, ultrasound, radiation therapy (IR & UV), TENS and IFT.
4. Demonstrate usage of therapeutic applications of physical medicine in promotive, preventive, curative and rehabilitative therapy, focusing on rehabilitation.

5. Analyse remedial measures in *Yoga* for various disease conditions.

Assessment Scheme:

Theory	-	70 Marks
Internal Assessment	-	30 Marks
Practical Assessment	-	90 Marks
Theory viva	-	60 Marks
Practical viva	-	30 Marks
Practical internal assessment	-	10 Marks

BOOK REFERENCE (BOTH THEORY AND PRACTICALS)

1. Principles of Exercise Therapy - By Dena Gardiner.
2. Tidy's physio therapy.
3. Cash text book of physio therapy.
4. Clayton's Electro therapy and Actino therapy.
5. Kisner's The therapeutic Exercise Foundation and techniques.
6. Maggie's text Book of Physio therapy

6. HOLISTIC PRACTICES OF NATUROPATHY & YOGA

Course type- Core Course

Course code – BNY 412, BNY 413P

Credits-3.5

1. Objective:

The objective of teaching Holistic practices of naturopathy & yoga to undergraduate students is to train them to provide well integrated clinical service in Naturopathy.

THEORY

Diseases of System:-

1. Cardiovascular Disorders
2. Gastrointestinal Disorders
3. Blood related Disorders
4. Respiratory Disorders
5. Neurological Disorders
6. Psychiatric Disorders
7. Musculoskeletal Disorders
8. E.N.T. Disorders
9. Ophthalmology Disorders
10. Obstetrics & Gynaecology Disorders
11. Paediatric Disorders
12. Metabolic Disorders
13. Hormonal Disorders
14. Neuromuscular Disorder
15. Mental Retardation Disorder
16. Psychological Disorder
17. Sexual Disorder
18. Post surgical Rehabilitation

19. Post Chemotherapy Rehabilitation
20. Skin Disorders
21. Tumors & Cancers
22. Affections due to Parasites
23. Affections due to Physical agents & Intoxicants
24. Care of Wounds, Burns, Bites & Stings
25. Accidents & Emergencies

Cure of Surgical Disorders:-

1. Deviated Nasal Septum
2. Tonsillitis
3. Appendicitis
4. Uterine Fibroid
5. Uterine Prolapse
6. Hernia
7. Intervertebral Disc Prolapse
8. Cervical Spondylosis & Slipdisc
9. Calcaneal Spur
10. Osteoarthritis
11. Hydrocele etc.
12. Prostate
13. Hemorrhoids (Piles)
14. Fistula
15. Pyorrhea
16. Gall Stone & Renal Stone
17. Breast tumor.

COURSE OUTCOME

After the completion of the course, the student shall be able to:

- a. Illustrate decision making in Naturopathy;
- b. Understand the basic principles of screening and prevention of disease;
- c. Comprehend the scope of practice- patterns of use, fields of practice, regulations, limitations;
- d. Understand the concept of healing and disease crises and management of the same.
- e. Understand the pathogenesis of the disease in Naturopathy basis and preventive measures of the same;
- f. Deduce and form a specific module of therapy for the particular patient with varied presentations.

Assessment Scheme:

Theory	-	70 Marks
Internal Assessment	-	30 Marks
Practical Assessment	-	90 Marks
Theory viva	-	60 Marks
Practical viva	-	30 Marks
Practical internal assessment	-	10 Marks

7. HOSPITAL MANAGEMENT AND RESEARCH METHODOLOGY

Course type- Core Course

Course code – BNY 414, BNY 415P

Credits-5.5

Objective:

The objective of teaching Research Methodology and Recent advances to undergraduate students is to provide them with the latest updated scientific, knowledge in the field of Naturopathy and Yoga and introduce them to research methodology.

THEORY

I - Medical Jurisprudence, Forensic Medicine & Toxicology

A. FORENSIC MEDICINE:

1. Definition of Forensic medicine and its scope.
2. Procedure of giving medical evidence with reference to Indian evidence act.
3. Methods of identification of living and dead body, race, age, sex etc.
4. Death:-Medico-legal aspects, certification of death, sudden death, causes, Medico- legal importance, sign of death, changes due to death and calculating time of death.
5. Medico legal autopsy.
6. Medico-legal wounds, their classification and study and medico-legal aspects.
7. Examination of blood stains, hairs and seminal stains.
8. Miscellaneous causes of death from heat, cold, electricity, Starvation etc.
9. Violent asphyxia deaths:- Hanging, Strangulation, Suffocation and drowning.
10. Sexual Offences: - Impotency and sterility, Virginity, legitimacy, un-natural Offences, Medico-legal aspects, Anesthetic death.
11. Infanticide.
12. Medico-legal aspects of insanity.
13. Forensic Psychiatry.
14. Definition, Police inquest, difficulties in detection of crime, legal procedure in Criminal courts and their powers, oath, medical evidence, medical certificate, Dying declaration.
15. Rules of giving evidence, professional secrecy.
16. Post mortem examinations.
17. Death - signs of death cadaveric rigidity and spasm, putrefaction, estimation of Time since death.
18. Death from asphyxia, differences between hanging and strangulation, suffocation and Drowning.
19. Death from burns and scalds and lightning.
20. Rape and unnatural offences.
21. Abortion, pregnancy and delivery, miscarriage.
22. Law in relation to a medical man, medical ethics, duties, professional privilege and responsibilities.

B. TOXICOLOGY:

1. General considerations of poisoning and classification.
 - a) Actions of poisons, factors modifying their action.
 - b) Diagnosis of poisoning.
 - c) Treatment of poisoning in General.

2. Poisons:-
 - a) Corrosives
 - b) Nonmetallicpoisons
 - c) Insecticides and weed killers
 - d) Metallicpoisons
 - e) OrganicIrritantpoisons
 - f) Somniferous poisons.
 - g) Inebriantpoisons
 - h) Delibriant poisons
 - i) Drug Dependence
 - j) Food poisoning
 - k) Spinalpoisons
 - l) Cardiac poisons
 - m) Asphyxiants
 - n) Miscellaneous
3. Legal responsibilities: Medicaethics.
4. Responsibilities and duties of the medical practitioners to the state, Professional secrecy and privileged communication.
5. Un-professional conduct and malpractice.
6. The rights and privilege and duties of medical practitioners.
7. The functions of state-medical council and its relationship to Indian Medical Council.
8. Medical ethics approved by Indian Medical council. PRACTICALS
 1. Ageestimation.
 2. Autopsies
 3. Skeleton remains.
 4. Spotters.
 5. Examination ofinjured.
 6. Alcoholic.
 7. Psychiatric.
 8. Toxicology.

TEXT BOOKS:-

1. Medical jurisprudence - ByModi
2. A Text Book of Forensic Medicine - By Narayana Reddy
3. A Text Book Of Forensic Medicine - By M.R.K. Krishna

6. Managing Time
7. Meetings SECTION3

SECTION-3

HOSPITAL ORGANISATION

1. Hospital Organisation - Structure and Function
2. Hospital Committees SECTION4

SECTION-4

THE HOSPITAL

1. Role of Hospital in Health Care
2. Hospital Planning and design
3. Special Features of Nature cure Hospital, Qualities of Therapist, Hospital Atmosphere, Scientific Attitudes, Awareness of Scope, Limitations of nature cure.
4. Newer Technology in Treatment Through Naturopathy

SECTION 5

THE CLINICALSERVICES & CLINICALSUPPORTIVE SERVICES

1. The Medical Staff Organisation, interaction withpatients.
2. Radiological Services
3. Laboratory Services

SECTION-6

THE NURSING SERVICES

SECTION-7

SPECIALISED SERVICE AREAS

1. Casualty Services
2. Disaster Services
3. Out-patient Services
4. Day Care
5. DiagnosticServices

6. Medical Records

SECTION-8

HUMAN RESOURCES

1. Personnel

SECTION-9

MATERIALS MANAGEMENT

SECTION-10

FINANCES

1. Finances
2. Activity based costing in Hospital
3. Economics of H.M.

SECTION-11

QUALITY ASSURANCE

1. Quality Management in our Hospitals
2. Medical Audit

INFECTION CONTROL

1. Control of Hospital acquired infection.

ETHICS & LAWS

1. Ethics
2. Law applicable to Hospitals
3. Consumer Protection act 1986

SECTION-12

1. Indian Health Policy

PRACTICAL

1. Visit to the different Hospitals.
2. Project work in Planning & Designing the Hospital

REFERENCE BOOKS

1. Hospital Planning & Administration - By Llewellyn Davies Macaulay, H.M.C.
2. Hospital Administration - By Francis C.M & Maria C.Desouza
